# Overview:

The Solyndra taxpayer, technology, financial and political disasters that began during the reign of Steven Chu at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the situation. This trend was created by the link between the U.S. Department of Energy and audacious kick-back schemes created by Silicon Valley campaign financiers and the 2008 White House. This is the story of the racketeering schemes and scams that attempted to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a “national economic emergency”. This free public-authored WIKI Book is a non-commercial documentation of those crimes.

## PART TWO OF TWO PARTS...

*Loan Guarantee LGPO Loan Number: F1001, U.S. Dep’t of Energy, June 15, 2010 at. 4 (on file with author).*

Nevada Geothermal Power, Inc., Conditional Loan Guarantee, U.S. Dep’t of Energy, Summary of Terms and Conditions at 4 Summary of Terms and Conditions (Stating “USE OF PROCEEDS: The proceeds of the Guaranteed Obligation will be used for following:

- (i) Partial repayment of intercompany loan from HoldCo in the amount of approximately \$80 million;
- (ii) Funding security requirements under the power purchase agreement signed on August 18, 2006 with NV Energy, f/k/a Nevada Power Company (“PPA”), either by posting cash collateral, cash collateralizing one or more letters of credit, or otherwise in accordance with the PPA in amount of \$3.8 million (the “PPA Credit Support”);
- (iii) Funding of the Debt Service Reserve Account in the amount of approximately \$5.5 million, Major Maintenance Reserve Account in the amount of \$125,000, and Drilling Expenditure Account in the amount of approximately \$8,400,000 (less amounts applied to reimburse the Borrower for Project Costs incurred prior to the Closing Date in connection with the Additional Wells (as defined below));
- (iv) The payment of certain fees and transaction expenses associated with the Guaranteed Obligation which are permitted to be paid with such proceeds under the Solicitation as set forth in Schedule 1; and
- (v) Initial funding of the Operating Account with all remaining proceeds of the Guaranteed Obligation.”).

*American Recovery and Reinvestment Act of 2009 §1602, Pub. L. No. 111-5.*

For this reason, it appears DOE, in its very first FIPP section1705-based loan guarantee, violated the spirit and, quite possibly, the letter of the law.

### **3. Given the “Pari Passu” Deal Terms and the Required Consent of all Lenders to Reorder Priority, the Terms of the DOE Loan Guarantee Appear to Violate the Requirement of Superiority under Title XVII, Section 1702(g)(2)(B)**

The Summary of Terms and Conditions in the Conditional Loan Guarantee signed by Secretary Chu that relates to the Blue Mountain loan guarantee, at page 8, provides for a pari passu and pro-rata right of payment for senior creditors. This means that the unguaranteed senior lender, John Hancock, stands equal to taxpayers in terms of recovering a share of their loss in the event of default. The Summary of Terms also requires the consent of all Lenders in the event that DOE seeks to “change to the priority of payment in the payment waterfall.” The combination of the pari passu credit terms, which ranked John Hancock as an equal to taxpayers, with DOE’s inability to reorder priority in case of a default, disables the ability of DOE to rely on its superiority as required under Section 1702(g)(2)(B).

### **4. Nevada Geothermal’s Continuing Problems**

Since DOE finalized Nevada Geothermal’s loan guarantee in September 2010, the project continues to have operational and financial problems. The project has an ongoing problem with electrical fires. In January 2010 (before the loan guarantee), part of the Blue Mountain plant was damaged after electrical cables were placed too close together and burned; a significant amount of cable was destroyed and had to be replaced. 294 In October 2011, another fire occurred because the seal on one of the pumps failed, causing part of the plant to go offline for major repairs. 295 Operational problems at the Blue Mountain project resulted in revenue being less than estimated the last four months of 2011. 296 Additionally, in November 2011, one of Nevada Geothermal’s major creditors considered placing Nevada Geothermal in default because of a late payment, 297 and Nevada Geothermal lost \$3.9 million in the fourth quarter. 298

### **F. Granite Reliable**

In September 2011, Granite Reliable Power, LLC, a wind generation company owned by the Brookfield family of companies, received a partial guarantee for \$168.9 million loan from DOE. 299 The funds will finance Granite Reliable Power Windpark, a wind generation project in

*?projects=granite-reliable.*

Coos, New Hampshire. Unlike other loan recipients, Granite Reliable was a very profitable company without any demonstrated need to obtain a loan subsidy in order to secure private financing. 301 A deeper look into the players and circumstances surrounding this decision suggest that politics may have led DOE to approve the loan. Until 2011, Granite Reliable was owned and controlled by Noble Environmental Power, Inc. Noble sold that 75% interest to BAIF Granite Holdings, Inc., just prior to the project's loan approval in September 2011. 302 BAIF Granite Holdings (BAIF) was created by Brookfield Renewable Power, a subsidiary of the \$3.2 billion company Brookfield Asset Management (BAM). 303 Brookfield Renewable Power financed the creation of BAIF from its Brookfield Americas Infrastructure Fund, which reportedly has assets totaling \$2.7 billion. 304 The remaining minority interest is owned by Freshet Wind Energy, LLC, which partnered with BAIF on the project. 305 Given the solid financial background from which Granite Reliable was formed, it is unclear why DOE determined that the company needed a \$168.9 million loan guarantee.

### **1. Investors**

Brookfield's Company Background: Board Members, Holdings, and One reason DOE determined a loan guarantee may have been necessary may lie in the inner workings of the BAM family of companies and the companies' strong Democratic ties.

BAM owns BAIF, which owns Granite Reliable, as well as Brookfield Office Properties (BOP). BOP's Board of Directors is chaired by John Zuccotti, the man for whom New York City's Zuccotti Park is named, and includes Diana Taylor, New York City Mayor Michael Bloomberg's long-time girlfriend. George Soros and Martin J. Whitman, both prominent Democratic donors, are both heavily invested in Brookfield. Moreover, Heather Podesta, sister-in-law of Obama's influential White House transition director John Podesta, and the Podesta Group served as the lobbyists for BAIF.

Nancy Ann DeParle: Obama's Deputy Chief of Staff for Policy and Noble Interest Holder As described in Section V, Part B of this report, Nancy DeParle suffered a conflict of interest during her time in the Administration. As indicated on her financial disclosure forms, prior to joining the White House, Nancy DeParle was one of five managing directors of a multi-billion dollar private equity firm CCMP 309 While with CCMP, she sat on the board of directors for Noble Environmental Power, LLC, one of CCMP's investments. 310 She served as a board member of Noble for about two years and quit in March of 2009. 311 Noble owned Granite Reliable.

Coinciding with her tenure at the White House, DOE considered a loan guarantee for Granite Reliable. The Granite Reliable project was well underway by late 2009. Noble then sold Granite Reliable in December 2010 to Brookfield Asset Management, just 6 months prior to the conditional approval of the DOE loan guarantee and deep into the application process. The DOE loan guarantee was conditionally approved in June 2011 and finalized in September 2011.

The ultimate approval of the DOE loan guarantee that followed the sale of Granite Reliable is tainted by DeParle's position within the White House and her financial interest in Noble. DeParle's position in the Administration could have been used to influence the successful sale by ensuring or increasing the likelihood of ultimate approval of the DOE loan guarantee. The loan guarantee would increase the value of the Granite Reliable, improving the sale price and, thereby, improving the investment of DeParle's son.

#### **G. Record Hill Wind: DOE Uses the First Solar Precedent to Speed Through Another Questionably "Innovative" Technology**

DOE relied on the First Solar precedent to approve Record Hill Wind's \$102 million loan guarantee project as "innovative," despite the project using commercial technology. DOE knew that the Record Hill project did not use significantly innovative technology. The Standard & Poor's credit rating for the project that DOE received clearly indicates the commercial (and non-innovative) nature of the project:

turbines to be installed at the site. The SWT-2.3-93 turbine has been in operation in Europe since 2005, and the first turbines in the US were installed and began operations in 2006. Currently, there are a total 1,374 SWT-2.3-93 turbines operating worldwide.....Due to harsh winter conditions in Maine, the project plans to install a cold weather package on all turbines, which will keep the turbines running in cold temperatures. Siemens' cold weather packages are currently in use on turbines in Canada, Norway, and other cold areas, and have performed to expectations. Along with a cold weather package, the project expects to make use of Siemens proprietary Turbine Load Control (TLC) technology...Given that the technology is software- based, however, and is not considered a fundamental component in the performance of the turbine, the TLC could be shuttered without damaging the turbine if it does not work properly. In this case, the turbines would continue to run similar to Siemens' existing fleet. (emphasis added)

Much like First Solar's "innovative" projects, the Record Hill Wind project attempted to categorize minor modifications to existing commercial technology as "innovativeness." DOE eventually agreed with Record Hill Wind's questionable reasoning. On December 14, 2010, Todd Shrader of DOE sent an email to several DOE personnel with the subject line "Eligibility Intepretation (sic)" that read:

An eligibility issue arose during the technical evaluation of Ocotillo Express (FIPP—F1033). This project is utilizing Siemens SWG- 2.3-101 wind turbine generators. It is claimed to be a commercial technology based on the wide spread use (including in this country) of the closely related Siemens SWG-2.3-93 turbines, which are essentially the same just with smaller blade lengths (101 feet vs. 93 feet). Without looking deeper into the design differences (which will occur at due diligence), I concur with the applicant that this is a commercial technology. However, for Record Hill, which is using SWG-2.3-93 turbines, it is claimed that this is a new and innovative technology, partially based on no use over 5 years in the US for these turbines. I also believe there were some differences in internal controls. However, the 101 and 93 units are essentially the same technology. Can the same technology be innovative under the Renewables Solicitation and Commercial under the FIPP's solicitation? (emphasis added)

Later in the day, Ruth Ku of DOE replied that the same question had occurred before with a different project and that the "project was asked whether it could obtain alternative financing in the private market...the project was able to get alternative financing (e.g., with John Hancock) and I think the recommendation was for it to move its application to FIPP...don't know where Record Hill is in its process for it to be

*Record Hill Wind, LLC., Standard & Poors Credit Report, July 1, 2011 (on file with author)*

*Email from Todd Shrader, U.S. Dep't of Energy, Dec. 14, 2010 (on file with author).*

*feasible for it to apply under FIPP at this point." Ruth Ku forwarded her email to Douglas Schultz, a Program Manager at DOE's Loan Programs Office. Douglas Schultz replied, "Record hill is well into due diligence with [D]avid [S]chmitzer. No reason to transfer at all. In terms of precedent of innovative and not look no further than first solar where there [sic] panels are both innovative and noninnovative*

*given the inverter used.” (emphasis added)*

Ruth Ku agreed with Douglas Schultz but worried that submitting two project applications using the same technology as innovative and not innovative could cause a “*policy issue for OMB.*” She wrote back to Douglas Schultz stating “[I]t cld [sic] be a policy issue for OMB if record hill followed Ocotillo. Think it’s probably less of an issue if record hill was first then Ocotillo.” 318 After scheming about how to get the two applications through OMB without problems, DOE allowed the Record Hill Wind project to continue as an “innovative” project. 319 DOE would eventually finalize a \$102 million loan guarantee (guaranteed 100% by the federal government) in August 2011.

#### **H. Genesis Solar: An Expedited Approval Process Now Threatens Entire Project**

On August 20, 2011, DOE awarded NextEra Energy Resources LLC (NextEra) a partial loan guarantee for \$825 million to fund the Genesis Solar Energy Project (Genesis). A planned 250-megawatt plant to lie on 1,950 acres of federal land located outside Blythe, California, Genesis plans to power more than 187,500 homes by 2014. 320 Standard & Poor’s gave NextEra a BBB+ rating, highly dependent on a long term Power Purchasing Agreement (PPA) with Pacific Gas & Electric (PG&E), and a Construction Completion Agreement with NECH, noting that if either’s credit ratings were downgraded in the interim, it would hurt Genesis’s rating as well. S&P emphasizes that the loan guarantee would only support the project for up to a six month delay. Additional delays would restrict Genesis’s ability to meet the PPA and jeopardize the success of the project. An accelerated state and federal site approval process allowed the project to gain DOE approval, but the hasty work may now endanger the entire project. Genesis’s original site resided on a section of Ford Dry Lake, which archeologists suspected contained ancient cremation sites. To minimize delays, NextEra moved the project two miles north to a new site, still on federal land. DOE’s application process requires extensive vetting of project sites for a variety of environmental factors. However, to expedite site approval, NextEra opted for a less thorough process developed by the state energy commission (The Commission) and the Bureau of Land Management (BLM) that would “streamline the time necessary to produce the

*Genesis Solar LLC , Standard & Poor’s, July 21, 2011 ‘BBB+’ Rating (on file with author).*

joint cultural resources analyses...foregoing potentially lengthy investigations to evaluate the historical significance of the cultural resources found.”

The Commission did warn Genesis of the potential consequences associated with the site approval process in August 2011, stating, “This approach however has the real potential to result in...delays in construction start-up, increase in requisite construction monitoring, and cost.” As part of the process, NextEra dug 500 test pits 3feet deep and found no artifacts, allowing them to proceed with construction.

After DOE granted final approval to the project and construction began, grading equipment unearthed grinding stones lying on a bed of charcoal, indicating possible evidence of human settlements. This discovery caused work to halt on 400 acres of the Genesis site while the company and regulatory agencies discuss various options. The hasty approval process that prevented the earlier discovery has

compromised the construction schedule and put Genesis in serious jeopardy of not satisfying its obligations under the PPA. NextEra has admitted that these delays may have serious consequences for the project; according to a NextEra Senior Vice President, “the project could become uneconomical.”

In addition to these problems, the new site also encroached on the habitat of the endangered Kit Foxes, native to the California desert. NextEra used “passive hazing” techniques approved by state and federal biologists to remove the foxes prior to site grading of the area. Essentially, NextEra sprayed coyote urine around dens and removed food sources.

Two dead foxes were found on site in October 2011, which died from Distemper, a disease similar to Rabies spread by bodily fluids, never previously recorded in Kit Foxes. Ultimately, seven foxes died from NextEra’s removal process.

### **I. General Electric’s Broad Access to Loan Guarantees: Caithness Shepherds Flat, 1366 Technologies and Kansas City Southern Railway Company**

General Electric (GE) sponsored a project called Caithness Shepherds Flat (Caithness), and also supplied the project with 338 wind-turbines. High level Administration officials expressed concern that the project was receiving an excessive amount of public subsidy, and that private parties did not have sufficient “skin in the game.” In a Memorandum for the President (“Summers’ Memo”) dated October 25, 2010, Carol Browner, Ron Klan and Larry Summers revealed concerns regarding excessive over-subsidization of the Caithness project, where grants, tax credits and loan guarantees provided 65% of the funding for the project.

Because of the excessive subsidy, the memorandum reveals expectations of a 30% return to the

*Letter from Mike Monasmith, Project Manager, California Energy Commission, to Scott Busa, Director, NextEra Energy Resources, LLC, Dec. 3, 2009, available at [http://www.energy.ca.gov/sitingcases/genesis\\_solar/documents/2009-12-03\\_New\\_Alternate\\_Approach\\_TN-54332.pdf](http://www.energy.ca.gov/sitingcases/genesis_solar/documents/2009-12-03_New_Alternate_Approach_TN-54332.pdf).*

*Louis Sahagun, Problems Cast Shadows of Doubt on Solar Project, L.A. T IMES , Feb. 11, 2012, available at <http://articles.latimes.com/2012/feb/11/local/la-me-solar-foxes-20120211>.*

private investors generated on the backs of taxpayers.

Four months after DOE approved the Caithness loan, President Obama named Jeff Immelt, the CEO of GE, as the Chairman (Job Czar) of the President’s Council on Jobs and Competitiveness (Jobs Council). As the Chairman of the Job Council, Immelt had direct access to President Obama. 327 Since Immelt’s appointment as Job Czar, two additional GE related

*About the Council, President’s Council on Jobs and Competitiveness, available at <http://www.whitehouse.gov/administration/advisory-boards/jobs-council/about> (Stating it shall, “Report directly to*

government-backed transactions have occurred. First, the poorly rated 1366 Technologies, sponsored in part by GE, 328 received a direct \$150 million loan commitment from DOE for its solar manufacturing plant. 329 Second, on February 22, 2012, the Federal Railroad Administration (FRA) loaned \$54.6 million to Kansas City Southern Railway Company (KCSR) under the Federal Railroad Administration-administered Railroad Rehabilitation and Improvement Financing (RRIF) Program to purchase thirty new General Electric ES44ACdiesel-electric locomotives.

Regarding KCSR’s purchase of GE locomotives, the railroad’s filings with the Securities and Exchange Commission (SEC) reveal a twenty-five year, \$54.6 million loan at 2.96%. KCSR received this loan despite reporting strong earnings. For the year 2011, KCSR reported operating income of \$612 million on \$2.1 billion in revenues, a 26% increase over the prior year – not the picture of a company in need of assistance in the form of a \$54.6 million loan. As a result of this subsidized loan, the highly profitable KCSR gained a competitive advantage over its freight rail competitors.

## VII. Breakdown of Problems with ATVM Loans

Each of the “Big Three” auto manufacturers, Ford, General Motors, and Chrysler, along with Nissan, applied for loans under the ATVM Program. Ford and Nissan are the only major manufacturers that received an ATVM loan. The companies received \$5.9 billion and \$1.4 billion respectively. Both General Motors and Chrysler withdrew their applications after waiting over a year for responses from DOE. Initially, financial viability was the primary roadblock that kept GM and Chrysler out of the running for Department of Energy loans. Some speculated that the entire program had been put on hold in order to give these two manufactures time to prove their financial viability and qualify for loans that would have drained the President on the design, implementation, and evaluation of policies to promote the growth of the American economy...”).

the program of remaining funds. 336 In the end, both companies withdrew their applications, choosing instead to seek private financing. The other loan recipients are Fisker, Tesla, and The Vehicle Production Group, receiving \$529 million, \$465 million, and \$50 million, respectively. 337 To date, the ATVM Program has loaned \$8.339 billion to five auto manufacturers for the production of ATVs.

It is unclear whether DOE has a set of objective standards by which it judges the relative merit of applicants. Based on materials obtained by the Committee, it appears that DOE applies inconsistent standards to each applicant, leaving innovative car companies in a state of perpetual uncertainty over how they will be treated under the process. These concerns are apparently shared by Senator Diane Feinstein, who wrote DOE complaining that, “On multiple occasions, the department has missed internal deadlines for initial decisions, term negotiations, final decisions and loan closure.” This haphazard administration of the ATVM Program creates confusion in the advanced technology vehicle market and may have actually hurt President Obama’s goal of fostering a new generation of vehicles.

Despite an apparent lack of discernible objective criteria to judge the relative merit of loan applicants, it does appear that ties to the Obama Administration were important for those companies securing an ATVM loan early on in the process. Both Ford Motor Co. and Nissan were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012- 2016 at the time DOE was considering their applications. Both companies eventually expressed publicly their support for these standards, which the Administration described as the “Historic Agreement.” In addition to this curious timing associated with the approval of Ford and Nissan’s loan, the other recipients each enjoyed close ties to the Administration. For example, Fisker was backed by Kleiner, Perkins, Caufield & Byers, which has significant ties to the Administration. One of the senior partners at Kleiner Perkins is former Vice President Al Gore. Another partner, John Doerr, serves on Obama’s Council on Jobs and Competitiveness. In the case of Tesla, board member Steve Westly was a major Obama campaign bundler and a frontrunner for the position of Secretary of Energy.

#### **Case Studies:**

There has been very little activity in the ATVM loan program over the last three years, as DOE has only approved one loan since April 2010. Moreover, the Committee has yet to receive a response from DOE to its February 10, 2012, letter asking for additional information about the loan application process. Even so, the Committee has gleaned some information about the companies that DOE has considered for ATVM loans. These stories reveal the haphazard manner in which DOE is administering the program and how ever-changing goal posts and broken promises have promoted the misallocation of scarce resources and pushed some innovative companies into bankruptcy.

## **Aptera**

Aptera first applied for an ATVM loan in December 2008, looking for money to fund the production of the Aptera 2e, a three-wheeled vehicle capable of nearly 200 miles per gallon. Although DOE rejected Aptera’s original application for a loan because a three-wheeled vehicle did not meet the criteria of a Section 136 loan, Congress amended the program in October 2009, and Aptera resubmitted its application in January 2010 for both the 2e and a four-wheeled vehicle. By late 2010, DOE determined that the 2e would not be able to pay back capital costs. Accordingly, Aptera shifted its focus to the 4e, a four door electric sedan, that DOE believed would be more suited to an ATVM loan program. After numerous negotiations with DOE, in September 2011, Aptera received a letter from DOE offering them a conditional loan commitment of \$150 million if the company was able to raise \$80 million privately.

Aptera shut down on December 2, 2011, citing the inability to raise additional private capital, having exhausted a bridge loan that was supposed to last through the time DOE made a final decision on the loan. At this point, Aptera’s investors had funneled \$40 million of their own money into the project. Former Aptera CEO Paul Wilbur and former marketing Vice President Marques McCammon have publically asserted that the prolonged timeframe spent engaging with DOE to secure a loan ultimately consumed their cash reserves. Wilbur stated that a “bright shiny object disease” characterized the ATVM Program and suggested in retrospect, “We should have raised the money ourselves rather than relying on DOE.” However, the loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company

throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company. 3

## Bright Automotive

Bright Automotive was an Indiana company that developed a plug-in hybrid delivery vehicle that it planned to market to fleet customers. On February 28, 2012, Bright sent DOE a scathing letter announcing that they “have been forced to say uncle” and that it would withdraw from the ATVM application process.

Bright applied for an ATVM Loan in December 2008 and its application was deemed “substantially complete” at that time. DOE continued to review the application for an additional 1,175 days. According to the company, Bright secured letters of support sent to Secretary Chu from large fleet vehicle users such as Cox, Comcast, and Bust Buy, and had order letters from Duke, Vectren, and Snap On.

According to documents obtained by the Committee, on March 2, 2012, Lachlan Seward, then the Director of the ATVM Program, indicated to Bright that a loan for less than \$300 million would be quickly approved. In DOE’s next communication, DOE suggested that Bright partner with a large OEM in order to speed up the loan process, intimating that conditional approval would occur in “weeks, not months.” Pursuant to this advice, Bright entered into a strategic partnership with GM in July 2010. At that time, DOE officials informed Bright that they would receive a conditional loan agreement within two months.

Two months later, DOE came back to Bright and directed the company to satisfy six additional loan pre-conditions. By January 2011, Bright received a “near final” conditional agreement for a \$314 million loan. It was reviewed by the DOE credit team for five months when on May 18, 2011, DOE determined that it would not consider Bright’s loan based on a volume consideration report generated by DOE, one that Bright had asked DOE to reassess. DOE contractors, A.T. Kierney, conducted a new volume study, which led to Bright’s reconsideration for a loan by DOE in June 2011. DOE once again assured Bright that just as soon as the company’s credit package went through the interagency process, it would receive an offer of

conditional agreement no later than October 2011. However, instead of an agreement, in October 2011, DOE told Bright to raise additional equity and perform other financial changes to bolster its balance sheet and credit. This last demand caused Bright to withdrawal from the ATVM loan process. In February 2012, the company closed down.

In their letter to the DOE, Bright’s CEO Rueben Munger and COO Mike Donoughe flatly stated that the ATVM process distorted the U.S. private equity markets, effectively making DOE the only way for ATV companies to receive funding. According to Munger and

Donoughe, DOE then used this position to submit the applicants to the control and “whim” of government bureaucrats. As the letter points out, the ATVM program, as DOE is administering it, contravenes the purpose of the program because it stymies rather than advances technology within the automotive market. After spending millions of dollars to comply with DOE’s endless finish line and consuming nearly three years of time, Bright withdrew its application from the ATVM Program, closing the company and its idea.

## Severstal

While DOE was stringing along potentially innovative auto manufacturers, they were working to approve a conditional loan agreement for a business that did not appear to qualify at all for the ATVM Program. In June 2011, DOE conditionally approved a \$730 million loan to steel company Severstal North America, a subsidiary of OAO Severstal, and a multibillion-dollar Russian steel and mining corporation. The ATVM loan would have financed Severstal’s expansion and re-equipment of a Dearborn, Michigan, steel plant, located within Ford’s manufacturing campus, to produce advanced high strength steel (AHSS). Chairman Issa challenged the appropriateness of this loan for several reasons: Severstal applied for a loan to produce AHSS, a material, not a “component part” as required under Section 136; 371 and it did not appear that the company needed public funding to “bring its product to market” as it was a subsidiary of a multi-billion dollar Russian corporation. Moreover, Severstal had already made significant strides towards completing the Dearborn project through private financing, even before receiving any money from DOE. 372 In its initial response to the Committee, DOE defended its due diligence and decision-making on the Severstal loan, touting the market strength of the company’s product. On January 6, 2012, DOE reversed its position and denied Severstal’s loan. When asked why it has changed its mind, DOE informed Committee staff “We [DOE] could not get

comfortable with apparent discrepancies and potential of fluctuation in steel prices,” and therefore would not offer the loan to Severstal. This explanation is curious, as DOE offered the conditional loan agreement based on a forecasted increase in market demand for AHSS. 375 DOE had originally projected Severstal to be the market leader in domestic AHSS production, even as other companies entered the American AHSS market. DOE decided not to give a final loan to Severstal and, in so doing, questioned the company’s ability to repay the loan. Based on the apparent contradiction between DOE’s analyses, it is obvious that DOE has no clearly established standard it uses to evaluate ATVM loan applicants.

## Fisker

One of DOE’s original loans has been suffering severe setbacks in production, and many have predicted its eventual collapse. In April 2010, DOE issued an ATVM loan of nearly half a billion dollars to Fisker. DOE froze the loan in February 2012, halting the issuance of

any further money, because the company failed to meet DOE's benchmarks. Fisker's woes began with with regulatory issues and delays in production of the Karma, Fisker's \$100,000 luxury sedan. Fisker has since engaged DOE to renegotiate its loan agreement and renegotiate benchmarks. Due to the financial troubles, including DOE's freezing of the loan, Fisker has laid off 23 employees from its Delaware manufacturing plant and 40 employees and contractors in its California plant. In addition, Fisker recently announced that it was replacing founding CEO Henrik Fisker with Tom LaSorda, a former executive at both Chrysler and GM. Furthermore, the Fisker Karma that Consumer Reports purchased to review broke down after less than 200 miles of operation and had to be towed 100 miles back to the dealer because the car would not even start. Based on this reshuffling and DOE's actions, Fisker appears to be a volatile company with a questionable future. Fisker's current problems raise serious questions about DOE's decision-making and an inconsistent standard in the ATVM Program.

#### **ATVM Conclusion**

DOE mismanagement of the ATVM Loan Program has put potentially viable companies out of business and caused major setbacks within the ATV market. DOE has only succeeded in

giving billions of dollars to two large auto manufacturers and to companies with strong political connections to the Obama Administration. However, hundreds of other companies wait in DOE's loan queue. At least two of these companies have declared bankruptcy after engaging with DOE for a number of years, believing, based on representations from the Department, that

they would eventually receive a government loan. Meanwhile, DOE conditionally approved a loan for a company that did not meet threshold requirement to be in the program. DOE's haphazard and inconsistent administration of the loan program has created significant uncertainty within the advanced vehicle manufacturing community and has potentially retarded progress on the next generation of automotive technologies.

#### Report Conclusion

The findings regarding the DOE loan programs discussed in this report tell only part of a much greater story—a story of mismanagement, waste and abuse symptomatic of reaching too far, working too fast, and spending too much to achieve unrealistic objectives. There are significant concerns about DOE's management and administration of the weatherization, 1705, and ATVM programs. And a management structure unprepared and incapable of dealing with the challenges it faced when pressed to push out the door tens of billions of dollars in a short period of time. In the days ahead, the Committee will continue its investigation and examine DOE's record on a loan-by-loan basis, with the continued hope that spotlighting these shortcomings will provide Congress and the American people with the insight they need to assess the true value—or cost—of these types of programs.

### Issa warns of huge tax losses due to Solyndra, Fisker Automotive loans

By Peter Kasperowicz • 10/22/12 10:42 PM ET

House Oversight & Government Reform Committee Chairman Darrell Issa (R-Calif.) charged on Monday that the controversial loan to Solyndra could lead to hundreds of millions of dollars in lost tax revenue for the government, beyond the \$535 million lost when the solar panel maker went bankrupt.

Issa wrote to Energy Secretary Steven Chu on Monday to ask for details about the tax implications of that loan, in the wake of reports that the tax losses from Solyndra could be as high as \$341 million. He summed up the Solyndra situation by saying the combination of loan and tax losses could put the real taxpayer cost of Solyndra at \$849 million.

In addition, Issa asked Chu to explain whether a \$529 million loan to a California auto company poses a similar risk of tax losses. Fisker Automotive received that loan in 2010 under the Advanced Technology Vehicles Manufacturing (ATVM) Program.

*\*As the Committee continues*

to conduct oversight on Fisker's ATVM loan, DOE is withholding important documents regarding these loans," Issa wrote in his letter. "Given DOE's noncompliance, the Committee cannot assure taxpayers that, in the case of bankruptcy, a similar subordination of taxpayer interests will not occur."

Issa cited press reports in explaining that in addition to the \$535 million lost through Solyndra's bankruptcy, the government was also hit by additional losses of up to \$341 million in tax losses. He said that loss was due to a restructuring of Solyndra's loan.

# Why the Government Should Stay Out of Green Energy

by Brian Sussman

In the realm of solar power, there has never been more fanfare for a startup than in the case of Solyndra. Founded in 2005, the company's rooftop-mounted solar panels were immediately touted as "the next big thing" in alternative energy.

Headquartered in the San Francisco Bay Area, Solyndra has been a magnet for venture capital cash from the Silicon Valley.

However, just before Solyndra's promising glow of success began to fade, the last big investor stepped into the boardroom: The Obama Administration. And man, did the American taxpayer get played.

As a local I watched Solyndra successfully raise nearly a billion dollars in private equity financing between 2005 and 2009. Simultaneously, I witnessed the company go on a wild infrastructure spending spree, throwing hundreds of millions into an over-the-top, designer-rich, state-of-the-art manufacturing facility—which is not inexpensive to do in the Bay Area. Real estate prices remain the highest in the country there, and construction costs are exorbitant too. Simply constructing a shell to house a manufacturing plant costs at least \$300 per square foot (Solyndra's was likely much more); and that figure doesn't include the specialized manufacturing equipment needed to build Solyndra's proprietary solar panels. By locating the plant next door in Nevada they could have reduced their construction costs by at least 50 percent.

After Solyndra built the first phase of its plant, it began spending another \$733 million on phase two: a 600,000-square-foot addition. That's where Team Obama stepped in.

Solyndra received a government guaranteed loan procured from Stimulus funds for half a billion dollars. The money was to be plowed into the new construction.

In announcing the deal, on September 4, 2009, Vice-President Joe Biden told Solyndra employees and associates, "By investing in the infrastructure and technology of the future, we are not only creating jobs today, but laying the foundation for long-term growth in the 21st-century economy." Biden was joined by Secretary of Energy Steven Chu who said, "This investment is part of a broad, aggressive effort to spark a new industrial revolution that will put Americans to work."

Yeah, right. Usually, before one enters into any investment, the risk of that venture must be identified and quantified. It's called "due diligence." The propeller-heads in the Administration—who have never worked in the real world—simply picked a feel-good, high-profile green company, and poured tons of taxpayer money into it.

As a guy who's raised money for a startup in the Silicon Valley, my thought was, if Solyndra remains such a great investment, why aren't the big fund managers jumping in to put up the additional half billion dollars? Additionally, as a conservative I saw this as another example of an overreaching federal government that chooses to ignore Article 1, Section 8 of the Constitution. Meantime, the smart financiers saw where Solyndra was headed—into trouble.

In May, Solyndra was visited by President Obama, who proclaimed that the Stimulus money spent on the new addition to the campus would be worth every penny. "When it's completed in a few months," Obama said, "Solyndra expects to hire 1,000 workers to manufacture solar panels and [to] sell them across America and around the world."

An Initial Public Offering of stock had been planned for Solyndra in June, but those plans were suddenly scrapped. In July, its CEO and founder, Chris Gronet, quit. Then, quite conveniently, on the day after the elections, we learned that Solyndra, the great green hope, was going to shutter its original manufacturing plant and scale back plans for those thousand jobs that Obama had heralded just a few months prior. The problem? Fierce competition from rival manufacturers in China and in states where the business climate is more agreeable.

"Solar has become incredibly competitive," David Miller, a Solyndra spokesman, told The Mercury News.

So, instead of having the 1,000 extra workers Obama said it would hire, Solyndra is laying off 175 people and will cap its workforce at fewer than 1,000.

Some say Solyndra might eventually pull through, but not anytime soon; there is no guarantee that the company will be able to get its manufacturing costs down, and no one is sure when they will finally turn a profit.

And get this: rumors in the Silicon Valley are that Solyndra had been asking for a second government loan.

In order for the government loan guarantee program to properly work (i.e., to have the government paid back with interest), the Administration needs to pick winners. Thus far their track record is awful (GM and Chrysler immediately come to mind).

*If Solyndra bombs out, you and I are on the hook.*

I believe we can raise the \$147M in equity based on reviews with investors since our last discussion, but under the following conditions:

1. Debt-to-Equity: 80%/20%. Total project: \$153M, 77% debt = \$118.8M, Solyndra Equity = \$34.2M
2. Confirm Solyndra does not pay Credit Schwelby Cost
3. Interest rate: 12.5 basis points above 7-year Constant Maturity Treasury
4. Solyndra covers any cost overruns, 100% guarantee but no pre-funding
5. Solyndra parent financial covenant expires at project completion
6. Waiver of \$4.3M Facility Fee
7. Change of Control: DOE consent right except for

# What May Have Actually Happened

- By A Former Solyndra Employee

In the waning period of the Bush Administration, The Bush White House saw one last chance to grab a major war-chest of cash before the Democrats took over. George Bush hired Lachlan Seward, from Chrysler schmoozing, to re-route part of the money, the part that was going to the Department of Energy. Seward's instructions were to pass along a portion of the money per an inside deal with the CEO's of Detroit's 3 biggest car companies. The 3 Detroit CEO's met together, planned together and hard-wired the money together via Mr. Steve Rattner. A few other people found out about this deal, in the transition period between Bush and Obama, and other due-diligence-free inside deals were made to shut them up. Seward hires a secretary and an intern from IBM named Brent Petterson. Brent has orders to set IBM up, under multiple front names to act as a "car company reviewer". IBM creates, and then buys, fake consulting companies in order to support the kickback scheme. IBM consulting was ordered to stall, delay, delete, lose, fake results and change test metrics for any applicant who was not tied to Detroit or White House Silicon Valley campaign financiers. IBM was fired as a reviewer when the dirty deeds started to unravel.

Since every company that did get money, now either has: gone bankrupt, had a worthless technology, a Russian mob connection (Ie: US Uranium mining deals and Afghan lithium ion mining deals) or had no way to compete with the other applicants if those applicants got a chance, this proves that the "due diligence" was fake and for appearances only. Chu directed his people to do no actual due diligence on the chosen few and to just hand them money and kill or stall the other competing applicants who didn't pay-to-play.

Then the Obama Administration moves in and Steve Rattner, Rahm Emanuel, David Axelrod and Robert Gibbs see how the scam is running and they say, "hey, we want to take that over!" ... "We are still going to do the scam but as prizes for our benefactors instead of yours".

Venture capital guys from Kleiner, Westley, Khosla and a little group of Silicon Valley VC's say: "Hey Obama, you want the big bucks? Put our guy Chu in the top spot and we will guarantee to slide contract cash and search engine rigging in your direction!"

The little group of VC's says to Chu: "Lean it our way and we will fix you up for life after you retire and buy you your own personal reactor".

Steve Rattner cuts a deal with the 3 Detroit CEO's and Silicon Valley to make sure that nobody who can compete with them gets any of the money. Seward creates what is now known as the "stall plan" to keep any other applicant from getting through the DOE funding review. Every bank in America spends 2 weeks on commercial loan applications yet DOE has stalled all applicants for years.

Later in the Obama administration top White House staff are notified that they are under investigation and that the jig is up. Rattner is then indicted in NY for securities fraud and the other 3 mysteriously leave their top-of-your-career jobs for no apparent reason at about the same time because they have been caught and deals have been cut. A turf war begins which only then becomes partisan. Some enforcement groups are trying to protect and some are trying to prosecute.

So how did people make money: the last two weeks of the 60 Minutes feature called THE CLEANTECH CRASH gave you part of the story: The insider trading story on 60 minutes was part of it; Abramoff and his step-by-step tips were how the other part worked; The other part was even trickier: the deal packagers took fees off the top of each deal and then walked away with their finder/factoring/incentive/VC or whatever-you-call-it-fee to forget about the company and allow it to languish. Three of the VC guys bet on one of the companies to fail and made margin when they did. Nobody checked on the companies, not DOE, not the bundlers: nobody. So the CEO's of those companies also stole money because: nobody was watching

## Solyndra in Grand Jury Crosshairs: Documents

FBI agents carry dozens of boxes of evidence from Solyndra headquarters in Fremont, Calif., Sept. 8, 2011. (Paul Sakuma/AP Photo)

By LEE FERRAN and MATTHEW MOSE  
Dec. 14, 2011

A grand jury has been convened in what appears to be the next significant step of the federal criminal investigation into Solyndra, the politically-connected and now bankrupt solar firm that received a half-billion dollar loan guarantee from the government, according to court documents.

The role of the grand jury was revealed in documents filed in bankruptcy court last week by K&L Gates, a law firm retained by Solyndra reportedly just weeks after the FBI raided Solyndra's California headquarters in September. The documents give a daily account of K&L Gates' employees activities in reference to Solyndra and often refer to communications concerning a "grand jury subpoena".

In the 1960s she worked in city government, and in 1970 she was elected to the [San Francisco Board of Supervisors](#). She served as the board's first female president in 1978, during which time the [assassinations](#) of Mayor [George Moscone](#) and City Supervisor [Harvey Milk](#) drew national attention to the city. In an interesting set of personally fortuitous coincidences, Feinstein succeeded Moscone as mayor when he was murdered. During her tenure as San Francisco's first female mayor she oversaw the [1984 Democratic National Convention](#).

After a failed gubernatorial campaign in 1990, she won a 1992 special election to the U.S. Senate. Feinstein was first elected on the same ballot as her peer [Barbara Boxer](#).

Feinstein was the author of the 1994 [Federal Assault Weapons Ban](#) which expired in 2004. In 2013 she introduced a new assault weapons bill, which failed to pass. Feinstein formerly chaired the [Senate Rules Committee](#) (2007–09) and has chaired the [Select Committee on Intelligence](#) since 2009. She is the only woman to have presided over a [U.S. presidential inauguration](#).<sup>[3][4]</sup> The CIA has broken into her computers, in a very public battle between the CIA and Feinstein. Journalist Glenn Greenwald and Whistle-blower Edward Snowden have published many critical reviews of Feinstein.

At the age of 82, Feinstein is the oldest [currently serving United States Senator](#).

Corruption Charges In The Cleantech Crash Case:

In Bullet-point, the charges against the Feinstein Family Cartel, in the Cleantech Crash Corruption Case include:

- Feinstein was the promoter, lobbyist and beneficiary of the side-by-side (on the same plot of land) Tesla and Solyndra government hand-out funding scandal.
- Feinstein's daughter, Kathryn, documented illicit actions by her mother, while in social habitation with the applicants
- While in the Mayor's office, Bruce Brugman, publisher of the top San Francisco weekly newspaper: *The San Francisco Bay Guardian*, documented and published nearly 100 corruption charges against Feinstein. Local law enforcement efforts, against Feinstein were nearly impossible, at the time, according to *Bay Guardian* staff because local politicians and authorities had been paid off by James Bronkema, David Rockefeller's "bag man" and John Molinari, the local mob "bag man". *Ex-Guardian* staff have suggested that associates of one of those two Feinstein financing clans had, possibly arranged the George Moscone assassination in order to position Feinstein for higher office
- Herb Newman, of Sausalito, California; Feinstein's relative, was awarded the staffing contracts for Tesla and Solyndra based on Feinstein's say-so, in direct conflict of interest
- Feinstein, and her Chief of Staff, warned applicant's about attempting to use the NUMMI auto factory, which she was covertly placing Tesla in and Solyndra next to. Tesla had already

publicly rejected the NUMMI building as “unusable” in the press, yet Feinstein talked Tesla into using it so that her husband's company could profit from it and so she could arrange kick-backs to Tesla, more easily

- Feinstein worked with Senator Harry Reid on the Cleantech Scams. Together, by helping White House staff and financiers manipulate the program, they made over \$50 Million in personal profits at taxpayer expense
- Feinstein staff worked for and were compensated by, Tesla and Solyndra. In some cases Feinstein staff and Tesla staff were interchangeable, in direct conflict-of-interest
- Feinstein's husband had financial interests in the railroad property adjacent to the Tesla and Solyndra buildings. Feinstein later got him the entire California high speed rail contract
- The Feinstein family owned the construction company which Tesla and Solyndra, used. They were given no-bid contracts
- Feinstein, and her husband worked with White House staff under Rahm Emanuel and Silicon Valley campaign financier John Doerr and associates involved with Kleiner Perkins to conduit bribes, and campaign financing, as stock warrants and positions
- Feinstein associate: Roger Boas, was arrested for involvement in a child prostitution ring for political pedophiles, and for embezzling money for the Moscone Convention Center construction
- The Feinstein Family held war profiteering contracts in Afghanistan, Bolivia and other regions which held the exclusive mining contracts for Solyndra and Tesla chemicals
- After Solyndra was raided by the FBI and went bankrupt, costing taxpayers over half a trillion dollars in losses, the Feinstein Cartel used the tax write-off losses to make a profit, via tax form manipulations on the tax-write-off losses from the Solyndra crash
- Feinstein, and her staff, sabotaged other applicants who were competing for the same funds as Tesla and Solyndra
- Even after Solyndra went bankrupt, the Feinstein family continued to profit off of the Solyndra scandal by re-leasing the buildings and collecting real estate profits
- Feinstein's family ran the property sales and leasing contracts for the Tesla and Solyndra buildings
- Gary D. Conley, a Bay Area solar and Hydrogen company CEO, whistle-blew on the corruption at Tesla and Solyndra and was later found with a bullet in his head behind a Northern California Air Force base. His family, and friends, charge that his death was “suspicious”
- Feinstein's family and associates held stock in Tesla, Solyndra and other “Clean Tech”

companies, which they acquired at key pre-announcement points, most likely based on insider information and the payola from bribes provided as stock warrants

- Feinstein, and her staff told Fremont, California city officers to not engage in discussions with competing applicants
- Although other, competing, applicants had been in written discussions, and negotiations, with senior executives at Toyota for the use of the NUMMI plant, Feinstein warned Toyota that only Tesla would be supported for the use of the plant. This was before anyone from Tesla had contacted anyone from Toyota, the owners of the plant, and after Elon Musk had been published in the press saying that Tesla could have no use for the building.

Conclusion:

The facts, evidence, testimony and surveillance clearly prove that Dianne Feinstein used her public office to stage a corruption program to provide public cash and resources to herself and her family for covert profits at taxpayer expense. She used her office to assist in the attacks and sabotage of U.S. companies who were competing for the same funds that she was manipulating.

Elon Musk, a billionaire, has now received billions of free taxpayer dollars in out-right cash hand-outs, tax waivers, free or low-cost resources, stock pumps and federal NASA contracts. Musk's companies would not exist today if not for taxpayer hand-out cash. No other living person has received this much taxpayer money from the Obama administration. No other living person has given so much money to the Obama administration through his companies, investors and partners, like Google. No other living person has had the Obama administration sabotage, terminate or rule against so many of his competitors. Federal records demonstrate this to be one of the most overt examples of a political campaign kick-back scheme in this decade. In Musk's carefully orchestrated, self-aggrandizing, media campaigns, all mention of his true financial connections, extensive fraud lawsuits, and employee distrust is carefully expunged.

## Elon Musk's Space Dream Almost Killed Tesla

By Ashlee Vance | [FOR BLOOMBERG](#)

Illustrations by [The Red Dress](#)

SpaceX started with a plan to send mice to Mars. It got crazier from there.

In late October 2001, Elon Musk was in a meeting with Jim Cantrell, a kind of international space broker. Although Musk had tens of millions of dollars and they were planning to buy a refurbished shuttle for sending a plant or some mice to Mars.

Ressi, a gangly eccentric, had been thinking a lot about whether his best friend had started to lose his mind, and he'd been doing his best to discourage the project. He peppered Musk with links to video montages of Russian,

## The Greentech VC Influence Over Washington

By [Katie Fehrenbacher](#) Aug. 18, 2010, 8:28am PDT [No Comments](#)

Buzz [\\_0](#)

There've been a couple articles in the past few weeks pointing to President Obama as the "[clean tech investor in chief](#)" and the [presidential VC with bets on clean energy](#). The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energy's (DOE) first [ARPA-E conference](#) (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didn't have a dedicated person in Washington — in some circles they call them lobbyists — maneuvering grant and loan programs, you weren't able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between \$50 billion and \$80 billion into clean power and energy efficiency initiatives ([depending on](#)

## U.S. stock markets are rigged, says author Michael Lewis

NEW YORK | BY JOHN MCCRAW

A Wall Street sign is pictured outside the New York Stock Exchange in New York, October 28, 2013. REUTERS/DAVID ALLEGRI

(Reuters) - The U.S. stock market is rigged in favor of high-speed electronic trading firms, which use their advantages to extract billions from investors, according to Michael Lewis, author of a new book on the topic, "Flash Boys: A Wall Street Revolt."

High-frequency trading (HFT) is a practice carried out by many banks and proprietary trading firms using sophisticated computer programs to send gobs of orders into the market, executing a small portion of them when opportunities arise to capitalize on price imbalances, or to make markets. HFT makes up more than half of all U.S. trading volume.

The trading methods and technology that make HFT possible are all legal, and the stock exchanges HFT firms trade on are highly regulated. But Lewis said these firms are using their speed advantage to profit at the expense of other market participants to the tune of tens of billions of dollars.

"They are able to identify your desire to buy shares in Microsoft and buy them in front of you and sell them back to you at a higher price," Lewis, whose book is available on Monday, said on the television program "60 Minutes" on Sunday.

"This speed advantage that the faster traders have is milliseconds, some of it is fractions of milliseconds," said Lewis, whose books include "The Big Short" and "Moneyball."

Those milliseconds can be valuable, making it possible to send around 10,000 orders in the blink of an eye.

## Consumer Reports' Tesla Model S P85D breaks—before testing begins

A broken power door handle is one of the most common Tesla problems

Last updated: May 15, 2013 02:15 PM

**Find Ratings**

Hybrids/EVs

See Dealer Pricing

A new car shouldn't have problems when you've owned it for less than a month. Yet Consumer Reports' brand-new \$127,000 Tesla Model S P85 D, with the fancy retractable door handles refused to let us in, effectively rendering the car undrivable. (Read "Why We Bought a Tesla Model S.")

After we'd owned the P85 D for a mere 27 days, with just over 2,000 miles on the odometer, the driver-side door handle failed. The door handles in the Model S retract electrically so they nest flush with the sides of the car when they're not in use. Walk up to the car with the key fob in your pocket, and the handles move out

to allow you to grip them.

Except this time, the one on the driver's door of our P85D didn't pop out, leaving us no way to open the door from the outside. And significantly, the car wouldn't stay in Drive, perhaps misinterpreting that the door was open due to the issue with the door handle. We have observed other vehicles (there's prohibiting driving with a door open.

We're far from the first Tesla owners to experience this problem. Our car reliability survey shows that doors, locks, and latches are the biggest trouble areas with Teslas and that the Model S has far higher than average rates of such problems.

Driver's door handle is stuck.

How The Democrats Ate Their Own Children

When U. S. Senators Harry Reid and Dianne Feinstein realized they could each make billions of dollars, personally, via their family stock holdings and campaign funds, they didn't waste a minute stabbing their own constituents in the back to get at that cash.

California and Nevada Green Car Companies, Solar Companies, Energy Technology Companies, Green Builders and Transit Companies were hacked off at the knees because they competed with the stock assets that Reid and Feinstein had acquired in their kick-back deals.

These other applicants were all "GREEN COMPANIES": supposedly the Democrat's favorite things. It doesn't matter, though, how green your company was, if it was in the path for the green cash from Tesla or Solyndra. Two of the favored companies who paid the kick-backs to federal officials.

Is the argument from Feinstein's office that: "there just wasn't enough money left at the Department of Energy" true? No, it is a 100% out-right lie. The Federal GAO, the people that watch for corruption, state that there has always been, and still is, billions, and billions and billions of dollars, set aside EXCLUSIVELY for these companies, that was never used. In Fact, there was always more than enough money to fund every single applicant.

Staff from ZAP Motors, Redwood Solar, Aptera and dozens of other companies have specifically stated that Harry Reid, Dianne Feinstein and their Cheif's of Staff, personally wrote to them, spoke with them and lied to them.

Under Eric Holder, Feinstein and Reid buddy Eric Holder, refused to take any action. Now it is Lynch's turn.

Harry Reid sabotaged the applicants for Department of Energy Funds if they competed with Kleiner Perkins companies who were funding the campaigns of Reid and Feinstein.

Further, Recent disclosures, such as the following, shed disturbing light on the depths of this criminal; behavior:

Did the LA TIMES Article actually disclose an organized crime operation involving some very famous

people? SHOCKER THEORY!!!

The LA TIMES just ran an article which exposes Elon Musk's funding system, based on Government hand-outs. Musk rushed to hold a press conference to claim the amount of taxpayer cash, he has received, was "just a pittance". Few, though, find over FIVE BILLION DOLLARS of tax waivers, credits, employment freebies, buildings, exclusive contracts, and other taxpayer provided goodies, to be "a pittance" in these tough times.

While it is true that Musk has now received more taxpayer hand-outs, than any individual in American history, one could argue that he is just a lucky business man.

But, just for the purpose of theoretical discussion, what if some of the darker theories about Musk's coincidental windfalls have some merit?

Let's jump right to the most sinister interpretation of things.

One of the whispered rumours, on the web holds that in 2007, right when Musk's silent partners, Eric Schmidt and John Doerr started, practically, living at the White House in a lobbying frenzy, the Democrats finally acknowledged that they really were the party of the poor, because they were flat broke. So some of them came up with the idea of creating a Department of Energy fund called the "ATVM Fund", loading it up with \$25 Billion kick-back dollars of taxpayer cash, awarding it only to Schmidt/Doerr/Musk related companies, and shutting out all of their competitors.

Indeed, history shows that the fund actually was created. It really got \$25 Billion, in a unique legal manner, which made the \$25 Billion irrevocable. Schmidt/Doerr/Musk's buddy: Steven Chu, was put in charge of it. He hired their friends to staff his office.

See where this is going?

So, per this theory, Musk is actually a kick-back conduit, protected by the White House, to spiff the DNC campaign funds...according to this theory. Which is just a theory. It couldn't really happen, right? The White House wouldn't prop up a guy just to keep him quiet and keep kick-back cash flowing.. right?

So this theory is kind of ironic because, in an amazing coincidence, everything that Musk get's involved in, is exactly stuff that the White House is promoting.

In an even more bizarre coincidence, to pull a scam like this off, the Schmidt/Doerr/Musk Cartel would need the help of U.S. Senators Reid and Feinstein, the most beloved American politicians in history. This whole theory must have come out of the fact that Reid and Feinstein made billions of dollars off of Schmidt/Doerr/Musk Cartel stock investments and campaign contributions, but, that was, of course just another funny coincidence. They even ran, and built, some of the properties that these Department of Energy "winners" companies sat upon. But, again, coincidence!

The main reason one might cast doubt on this theory is that there are so many hard facts to prove it, that it is just too good to be true" right?

These internet crazies—these “theorizers”—point to actual facts like the one where all of the profitable chemicals that Tesla and Solyndra were going to buy and sell in volume were controlled by the investors in Kliener Perkins and commodity-managed by their partners: Goldman Sachs. That’s just another funny coincidence.

The “theorizers” point to the fact that Musk’s companies have poor business volume, but show a profit whenever there is bad news thanks to Kleiner rushing out to “Flash Boy” purchase Tesla stock, with an automated stock buying system, in order to pump the stock. Federal, and private investigator, records show that this actually happened. It has also been proven that only Google, Reddit and the other Kleiner-controlled web-news-media mask all negative Musk/Tesla news in perfect synchronization with the stock pumps, when no other publications on the planet do. Again, these are just coincidences. If people were consciously doing those kinds of things it would be mobster-ism on a Godfather-class scale. But, that couldn’t have happened.

Then..get this; “rumour people”, who seem to just be ecstatic about all of these coincidental, highly suspect things, go off on yet another “FACT”. They point out that originators of the scam, from the White House side, had to be Emanuel, Plouffe, Axelrod, Rattner and Gibbs. Then they go on to point out that Emanuel, Plouffe, Axelrod, Rattner and Gibbs suddenly quit the White House at the peak of their career for reasons that don’t make sense. The fact that one of them was indicted for stock market fraud only goes to strengthen their case, but, again—these things happen.

So, even if this really had happened, the brave and fearless protector of ethics and morality: Mr. Eric Holder, would have cracked right down on his friends here, who he knew personally, and had dinner with, and had the same lawyers with- oh,.. well.. but anyway. Eric would have jumped on them, right? The White House wouldn’t order the Justice Department and the FBI to ignore Elon Musk, John Doerr and the Silicon Valley Cartel as a kick-back protection order, now would they?

Mobsters kill people. Rajeev Motwani, David Bird, Gary D. Conley, 3 Tesla engineers and a large bunch of others did, certainly, die under mysterious circumstances, and they were all people that this cartel would want dead, but to say that these billionaires are off murdering their adversaries using mysterious CIA stealth murder tricks is overly intriguing.

Of course, as we all now know, every single one of those companies in the ATVM Fund scam grabbed the cash, paid their CEO and Goldman Sachs insiders off-the-top, and immediately went bankrupt in the largest government-funded sequential business-failure suite in history. While some argue that a secret GOP Task Force discovered the plot and forced all of the Kleiner Cartel DOE “Winners” to collapse, in punishment, this is probably another coincidence.

Here is the main argument against this theory, Mobsters are big greasy looking guys with bulbous broken noses and slicked back pompadours. These Musk and Kleiner people wear khaki’s and black turtlenecks. KHAKE’S for god-damn sakes!! You never saw a mobster in khaki’s, right? They shouldn’t have used a Federal agency as the scam front. They should have used a family foundation, like Hillary did. But none of this happened. So, who cares?

So we have clearly crushed another internet rumour from those damn bloggers. Whew!

Based on published federal and media investigations, it appears that White House Staff and Silicon Valley billionaires engaged in a racketeering operation to manipulate hundreds of billions of dollars of taxpayer funds into their own pockets via TARP and Department of Energy funding programs created for the purpose of running this scam. The individuals involved, are charged with organized crime activities, by investigators, but major regulatory agency executives have participated in delays, and cover-ups, in order to prevent effective prosecution of the parties involved.

All of the parties involved in the swindle have now had their communications, meetings, money paths, beneficiary routes and competing interest attacks tracked, documented and verified.

Major banking and corporate entities participated in the crimes and, while all of the banks have been charged with other crimes, they have yet to be prosecuted for this crime.

Any jury trial evidence presentation opportunity can now clearly document the crimes, the players and the facts of this case.

The many investigators, journalists and members of the public, who participated in the assembly of this evidence, challenge all parties to come forward in a live, televised, open public hearing to confirm, or deny, these facts.

Read the facts, decide for yourself:

Tesla: 45500 Fremont Blvd., Fremont, CA 94538 & Solyndra: 47488 Kato Road, Fremont, CA, 94538  
Feinstein's ex-staff & lobbyists work there now. She opened both plants and lobbied them into existence in that location. All that taxpayer money went to those two lots yet hundreds of other applicants were "killed off":  
COINCIDENCE?

-----  
U.S. Government Vs. Senator C. and Does 1-20

Tonight Al Jazeera ripped Feinstein's colleague, one Mr. Calderone, a new one per an FBI sting operation. He's off to jail soon. You can see the movie about his crimes on America Tonite. Will he roll over on Feinstein and the Senate bribes-for-laws program? It is early in the game and pleas are only just getting discussed.

Ms. Feinstein has some movies out too:

<https://www.youtube.com/watch?v=-r6qsQNURow>

Who is Dianne Feinstein?

If you were in the Senate and you had been involved in corruption things, you would want to try to get

yourself on the Senate Intelligence Committee so you could use, and monitor, agency information and resources to make sure nobody found out about the corruption things you and your husband were doing. Let's take Dianne Feinstein and her husband Richard Blum and his CBRE and vast other stealth companies and funds.

When she was mayor of San Francisco, the San Francisco newspapers were rife with charges of corruption and cronyism about her. Her associate, Roger Boas, went to federal prison for corruption in City Hall AND for child prostitutes. Police reports show that he used child prostitutes plus sent prostitutes out to buy favors for City Hall corrupt winner/loser rigged selections.

She personally interceded in getting Solyndra funded from taxpayer dollars and getting them to build the Solyndra buildings where it benefited her husbands business connections. Her Family made profits off of Solyndra getting picked as a DOE funding "winner".

She personally interceded in getting Tesla funded from taxpayer dollars, and getting them to acquire buildings (physically next to Solyndra in the boondocks of Fremont, California) and equipment where it benefited her husbands business connections. Her Family made profits off of Tesla getting picked as a DOE funding "winner".

Guardian staff report that her husband has made multiple trips to Mongolia transporting cash for deals and now holds business interests there on mining companies that make materials for electric car batteries and other interests that she fought for bill or budget passage on. They have airport records, travel expense reports and photographs of him in Mongolia meeting with sketchy Chinese and Asian Business men. They state that he took suitcases full of cash to Mongolia. Why did Feinstein not properly document this in her disclosures? What intelligence did Blum get near, or to, China?

Richard Blum got a group of Silicon Valley VCs to buy votes, get out the vote for her and push votes to get her on Committee when she was hanging by a thread from previous near-catches of their misdeeds according to a former reporter from ValleyWag.

Feinstein wrote laws regarding the Regents of California which benefited her husband.

If you web search their names and "Corruption" or "Crony" you will find a vast number of stories about all kinds of kickbacks that the Feinstein/Blums have been charged with.

And a person like this has access to all the secret files?

When you chart out all of the front companies, fake family trusts under other trusts, Blum offshore accounts in Belize, The Caymans and other interesting places, companies behind other companies between her and Mr. Blum, you have a facade of misdirection and phoney business names that would make any spy envious. Feinstein's bills and budgets tie back to more false front organizations that benefit her family interests than almost any other person in the Senate per the latest research from The Guardian.

If you were someone like that you would certainly try to get yourself on the intelligence committee so you could have the first clue when you were about to get caught and to steer investigations away from

your crony deals. You would certainly support domestic phone-tapping because you would order such taps on your public-interest agency enemies like the ACLU and BigGovernment.com and The Schweizer team in order to keep an eye on them. Of course she is fighting on behalf of ongoing domestic spying. It is how she covers her ass.

UPDATE:

Here is a teeny, tiny selection of the many corruption charges against Feinstein:

Greenwald asks: "What is the relationship between Feinstein's husband's company: CBRE; and the Tesla, Solyndra and other Green Loan Real Estate deals?"

Demand Answers:

How many times has Richard Blum been to Mongolia and what did he take with him that he did not return with and what did he return with that he did not take with him?

SD- LAT

-----  
NUMMI

Why did Feinstein and her staff sabotage other companies trying to use NUMMI?

What is the relationship between the Comptroller of Fremont California, the Mayor and Feinsteins staff?

Elon Musk is on public record, published and recorded in national media, saying that NUMMI is no good for Tesla and a bad choice for Tesla. Why did Feinstein make him flip flop?

What is the relationship between NUMMI, the properties adjacent to NUMMI, The adjacent Solyndra property and the real-estate company owned by Feinsteins husband: CBRE?

Why do the Feinstein staff that helped get TESLA its taxpayer money now work FOR TESLA? Isn't that illegal? Isn't that unethical?

Do the CIA, The NSA and federal investigators have recordings of Feinstein breaking the law? Did Snowden get some of that data in his cache? Is that why Snowden and Greenwald are so comfortable mouthing off to Feinstein?

What is going on in that meeting with the City of Fremont insiders that Feinstein's chief of staff headed up and who recorded that on their cell phone? It sounds suspicious.

Why did TOYOTA and GENERAL MOTORS say that NUMMI was a "failed plant"?

What was the fire and explosion that the Fremont fire department responded to at the Tesla Nummi plant?.... no, not the second one where the hot metal burned the workers, the earlier one?

Why did Feinstein met with UAW representatives and promise them NUMMI jobs if they supported requested issues and then how many UAW jobs did Musk actually keep on site? Why does LinkedIn show a huge number of Tesla H1-B lawyer hires advertised when all workers were supposed to be American's per the U.S. tax dollar funding?

There are many more questions the federal investigators are asking, let's keep an eye on this...

“A Massive Surveillance State”: Glenn Greenwald Exposes

GLENN GREENWALD: I think Dianne Feinstein may be the most Orwellian political official in Washington. It is hard to imagine having a government more secretive than the United States. Virtually everything that government does,

[democracynow.org/2013/6/7/a\\_massive\\_surveillance\\_state\\_g](http://democracynow.org/2013/6/7/a_massive_surveillance_state_g)

Glenn Greenwald

-----

Now Feinstein is trying to cover her tracks and act like she thinks spying on American’s who were trying to end cronyism was “unacceptable”. Don’t buy her sudden change of tone. It is all a cover, just like all of her husbands vast network of cover organizations and secret VC kickback networks. If you want to do really big crimes in Washington, you get Feinstein to watch the databases to make sure nobody gets wind of it. It is like the one bank robber that sits in the car to listen to the police scanner during the bank robbery.

GG

-----

If Feinstein’s husband turns out to be a spy for China, wouldn’t that just suck the big one? How can she have so many nasty news articles about her online in very detailed stories by very famous journalists and Washington has never held an investigation on her?

Julie Lentin

Husband’s Business Ties to China Dog Feinstein - Los Angeles

For years, international financier Richard C. Blum’s vast business portfolio has persisted as a nettlesome issue for his wife, Sen. Dianne Feinstein (D-Calif.), a vocal proponent of increased China trade. Three years ago, he vowed to turn over any profits from his China investments to

[articles.latimes.com/2000/oct/20/news/mn-39450](http://articles.latimes.com/2000/oct/20/news/mn-39450)

<http://articles.latimes.com/2000/oct/20/news/mn-39450>

-----

Ok, Here is the most extreme theory ever,

but it is amusing:

“Google, Twitter and Facebook are actually spy agency sting operations and were originally created as such. They conduited the money through Kleiner Perkins offices to launder it. They paid Kleiner’s people off by giving them monopolies on the electric car and battery industries and associated mining interests.”

I saw that on a blog and just had to repost it.

How about them Apples? One of the original founders of Twitter is running around saying it wasn’t what he had in mind. Even though they are supposed to be competitors you usually see their “join” or “login as” buttons clumped together on other sites and they sell ads for each other secretly. Those “Google Barges” could just be international waters scrutiny evasion systems. While it sounds crazy, with all the related news coming out this week, it could almost be true. ;-)

H.T.

---

## Feinstein Corruption Scandal

Last week California Senator Diane Feinstein abruptly resigned her position as the chairman and ranking member of the Senate Military Construction Appropriations Subcommittee (MILCON). The MILCON subcommittee is in charge of supervising military construction. The committee also oversees "quality of life" issues for veterans, which includes building housing for military families and operating hospitals and clinics for wounded soldiers. During her six years as MILCON leader Senator Feinstein had a conflict of interest due to her husband Richard C. Blum's ownership of two major defense contractors, who were awarded billions of dollars for military construction projects that were approved by Senator Feinstein. That's Billion with a capitol B. My very own California Senator Diane Feinstein may have just hit one out of the park folks. By directing Billions of dollars of our tax dollars to her husbands companies, DiFi may have have set a new record for corruption. According to a report compiled by MetroActive a San Francisco area newspaper Diane Feinstein used insider information to direct billions of dollars of military construction projects to companies, URS Corporation and Perini Corporation, that were owned or controlled by her husband.

While setting MILCON agendas for many years, Feinstein, 73, supervised her own staff of military construction experts as they carefully examined the details of each proposal. She lobbied Pentagon officials in public hearings to support defense projects that she favored, some of which already were or subsequently became URS or Perini contracts. From 2001 to 2005, URS earned \$792 million from military construction and environmental cleanup projects approved by MILCON; Perini earned \$759 million from such MILCON projects.

792 million and 759 million works out to 1.551 Billion dollars. And what portion of this billion and a half dollars did DiFi and her husband pocket?

In 2005, Roll Call calculated Feinstein's wealth at \$40 million, up \$10 million from just a year earlier. Reports show her family earned between \$500,000 and \$5 million from capital gains on URS and Perini stock. From CB Richard Ellis, her husband earned from \$1.3 million to \$4 million.

Public records show Blum's company paid \$4 a share for controlling interest in Perini, and later sold about three million shares for \$23.75 each.

The report also showed URS' military construction work in 2000 was only \$24 million, but the next year, when Feinstein took over as MILCON chair, military construction earned URS \$185 million. Additionally, its military construction architectural and engineering revenue rose from \$108,000 in 2000 to \$142 million in 2001, a thousand-fold increase.

In late 2005, Blum sold 5.5 million URS shares, worth \$220 million

So a US Senator has used insider information to direct billions of tax payer dollars to her husband's companies and yet I have not seen one word of this in a single antique media outlet. Where is the outrage, where is the indignation, where are CNN, Fox, MSNBC, NBC, ABC, CBS news? And even more importantly where is an investigation by the Senate Rules Committee? Oh wait, Difi is the newly appointed chairman of the Rules Committee so I guess we can rule out an investigation there.

So after pocketing over as much as 300 million dollars as a direct result of her involvement with the MILCON committee DiFi just walks away unscathed?

Where is the investigation and where is DiFi's resignation followed shortly by her indictment? Or does that only happen to Republicans?

Full information can be found here and here and here.

---

The federal investigation of DiFi is under deepest security because she keeps pulling the plug on the stings and research in her current position, but multiple agencies are still working the case and now multiple news organizations so her day will come.

Andrea - LAT

---

RT, Al-Jazeera and The Guardian are all said to have narrowed their focus onto Feinstein with a blockbuster story on her expected from one, or all, soon. Glenn Greenwald has been building an ongoing large-format story on her, and took her on, previously. His story, though, is likely not the same as the Guardian effort. Andrea - LAT

---

TESLA: CATCHING-FIRE

We are most interested in having Elon Musk answer these, and other questions, in front of the U.S. Congress during a live broadcast:

Deposition Draft 2.7 (compiled by reporters & public submissions)

- Would Tesla Motors exist today, if Senators, DOE and campaign staff had not been bribed in 2007, 2008 and 2009?
- Has your company, or anyone associated with your company, ever hired multitudes of fake bloggers to post fake positive reviews about Tesla motors in order to create a fake perception of interest?
- Has Tesla Motors ever compensated a publisher, or industrial rating company, for contrived positive reviews or ratings?
- Does Tesla Motors believe that the coordinated manipulation of the public perception of a company, trading on the stock market, via the dissemination of inaccurate data, by the company spokespeople, is not stock fraud and a not a violation of SEC laws?
- What percentage of Tesla Motors do Google's investors, staff and executives own cumulatively?
- How much money did those Tesla/Google investors contribute to election campaigns from 2007 to today? Which campaigns? Did the winners in any of those campaigns award U.S. taxpayer funds to the portfolio companies of those investors? How much money?
- When Tesla Motors applied for the Department of Energy funds Elon Musk stated that Tesla was in exceptional financial health, yet now Elon Musk, and his senior staff, have been recorded stating that the company was nearly bankrupt then. In light of these more recent revelations, is that not a felony violation of the federal "Section 136 Law" which states that 'a company cannot be on the verge of bankruptcy or it shall not receive Department of Energy funds'? New disclosures show that Tesla stated information in it's federal application which Tesla's founders and staff have stated they knew was false at the time. Should Tesla be prosecuted for this?
- Did Deloitte, under contract to Tesla, arrange false accounting via the Tesla Wells Fargo bank account while Deloitte was also acting, in conflict of interest, as the Department of Energy reviewer of applicants?
- Does Tesla Motors have a confidential relationship with a national group of reporters, from different publications, who have agreed to release Tesla-positive news spin stories on a synchronized basis, at the same time, in order to coverup Tesla investigation disclosures and artificially accelerate stock market vales? Has Tesla Motors arranged with Google to have negative Tesla Motors stories down-ranked while having positive Tesla stories up-ranked? Would that be considered stock fraud?

- How many Senators and their families, that you are aware of, own stock in Tesla Motors?
- Was Elon Musk promised any NASA contracts, in advance of the closure of a portion of NASA, in exchange for campaign funding from Tesla and Google investors?
- How many Senators, their families and Google-related investors, that you are aware of, hold stock in lithium-ion battery related companies?
- Has Steven Chu, the former head of the Department of Energy, ever had a personal relationship with any Tesla staff or investors?
- Has Senator Dianne Feinstein, or her family, ever had a personal relationship with any Tesla staff or investors?
- Why are Tesla and Solyndra on the same physical plot of land?
- Has anyone from Senator Dianne Feinstein's office also worked for Tesla Motors and/or Solyndra?
- Did Dianne Feinstein's husband, Richard Blum, ever travel to Mongolia to arrange for resource deals beneficial to Tesla's investors?
- Has anyone associated with Senator Dianne Feinstein's family, named Herb Newman of Sausalito, California, ever supplied staffing to Tesla Motors?
- Has anyone associated with Senator Dianne Feinstein's family had any relationship with the real estate transactions involving Tesla and/or Solyndra real estate?
- Now that the CIA has hacked into Dianne and Kathryn Feinsteins computers and all of Richard Blum's personal and business computers, do you think they found anything incriminating? Do you think the NSA phone and email records from 2007, to today, show anything incriminating?
- Federal whistle-blowers have stated that Tesla Motors was involved in a felony funding kick-back scheme with Dianne Feinstein. Is that true?
- If these charges are true, did you think you would never be caught because the same people who put Eric Holder and Steven Chu in office are paying for the cover-up? Now that Steven Chu has been terminated and Eric Holder is facing multiple charges of contempt, are still feeling so cocky?
- Communications between The California, Fremont City Administrators, Dianne Feinstein's senior staffer (M. Nelson) and the general management of NUMMI indicate that economic and political pressure was used to manipulate a deal structure. What is your comment on these revelations?
- Panasonic, your battery partner, has been charged with organized crime, dumping, price fixing, the deaths of thousands of battery workers from toxic poisoning and with building lethal battery factories that destroyed all of the towns near them. Is that a problem?

- You said, in writing, in your DOE application documents that the car to be produced with the DOE money was all designed and engineered, yet every aspect of the released model S was designed and engineered AFTER you received the DOE money! Did you lie on your application?
- Do your battery packs release toxic and/or cancer causing fumes when they burn?
- What was your relationship with Eric Strickland, the head of the National Highway Transportation safety agency who quit his job 48 hours after being notified that the toxic Tesla report he knew about was going public?
- Did you falsify lithium-ion safety reports?
- Bernard Tse, your battery program director, and 7 other senior staff, provided your company with numerous severely concerning lithium-ion safety reports which were never presented to the Department of Energy. Were these reports covered up because the Senators and Investors of Google and Tesla all have ownership interest in the lithium-ion industry?
- Has Elon Musk ever spied on his own employees and competitors?
- Has Elon Musk ever undertaken sabotage programs against his competitors?
- Did your SEC filings use tax credits from the White House to make Tesla look like it had profits?
- Did Elon Musk actually found Tesla or did Martin Eberhard found Tesla and Elon Musk then came in later and stole it from him in a hostile takeover?
- You said there were no chances of fire yet you have had two recalls in order to install fire prevention systems AFTER there were fires. Why is that?
- What was Tesla's debt ratio at the time that Tesla applied for the DOE loan? Why do you think Tesla had the worse debt ratio of any applicant yet Tesla was awarded funds with almost no review?
- Why has Tesla spent billions, and a decade, to only sell a few cars when all of your competitors have done 20 times better on less money and in less time? Why are over 200 technical problems with the car documented online by Tesla owners yet you say nothing about those problems? Why are you being sued for fraud under the Federal "Lemon Law"?
- Why were your cars \$100,000.00 over budget PER CAR, at the time of your Department of Energy loan application, yet nobody at the DOE commented about that in their review notes?
- Did Steven Chu's senior staff: Matt Rogers and Steven Spinner have any relationship with Tesla-related investors prior to Chu hiring them at the DOE? Was it coincidental that McKinsey Consulting, the company they worked for, produced all of the pitch documents for the White House and Congress, which were used to steer the Federal funds to Tesla Motors?
- Was Tesla Motors funded as a gift to campaign investors?

- Did you lie about asking the NHTSA to conduct a safety study on your car when, in fact, the NHTSA first asked Tesla for a study after fires were reported? Did you then bribe NHTSA officials to halt the request for an investigation after you plea-bargained to install a "titanium safety shield" which, in fact, only solves a small portion of the potentially lethal dangers from your battery pack? Is your battery pack made up of "non-automotive" batteries which are being used in the wrong way relative to what they were built for?
- Are you trying to build a battery factory not far from Mexico in order to take advantage of Mexican workers? Are you concerned that most battery factory workers in China were poisoned with toxins? Are you concerned that your battery factory will ENCOURAGE immigration abuse and devastate our border?
- The founders ex-partners, investors, buyers, suppliers, employees and ex wives have sued Elon Musk for fraud? What does that say about Mr. Musk?
- How many of your employees have been burned alive at your factories? Has OSHA ever fined you?
- If somebody puts a bunson burner or torch under a Tesla, will it blow up? If hackers hack the easily hacked Tesla, can they make the battery charging system overload and blow up? If so, did you inform the NHTSA of this in writing? When?
- Did California State Officials, in Sacramento, California, ever manipulate tax laws and decisions to exclusively benefit Tesla Motors in exchange for perks?
- What percentage of your buyers have killed members of the public with their Tesla Vehicles? Why is that number, in relative terms, higher than any other car company?
- What percentage of your buyers have crashed their Tesla's while driving drunk, destroying public property, homes and Tesla's? Why is that number, in relative terms, higher than any other car company?
- Have White House staff agreed to protect Tesla, at all costs, in order to keep Mitt Romney's prediction from coming true and to cover campaign funding billionaires?
- Did Tesla representatives meet with Rahm Emanuel, David Axelrod, David Plouffe or their campaign staff prior to the Election of President Obama?
- Is it not true that you have sold 4000% less cars than you told the U.S. Government, in writing, you would sell by this date, in your DOE application documents?
- Why did you switch your factory plans between 5 different cities, during the DOE loan process, when you told everyone that your factory location was already a done deal?
- Do your VC investors pump the stock market rating by buying their own Tesla stock when bad news comes out about Tesla in order to create a synthetic cover-story short term stock rise? Would that be considered part of a stock fraud activity?

- What is the relationship between Tesla's investors, Google's investors and the VC funds of Richard Blum, Dianne Feinstein's husband?

Any reporter who can get a legitimate set of responses to these very important questions, is encouraged to post those responses

Anatomy of A Civic Corruption Case- San Francisco- The Bridge To Sin  
THE COLD CASE THAT IS NOW VERY HOT! INVESTIGATORS NOW HAVE THE FINAL

## PIECES OF THE PUZZLE!

### Part 1- The Golden Days

See how the Golden Gate Bridge and a little bridge between two buildings at Embarcadero Center connected to an organized crime and child sex abuse ring for billionaires in A billion dollar real estate political kickback scam, by San Francisco "elites", to create an owned and controlled Senator.

Interesting that one has posted pictures of them-self dancing and hugging very young girls on Facebook, one was arrested and indicted for running an underage prostitution ring for billionaire campaign backers and San Francisco "elites", One (A senior public official) had their daughter removed from their home by the police because she was sexually abused (Police reports available) and one was charged with hiring underage prostitutes.

FLOWER\_GIRL446799 You would think it would be hard to be indicted for BOTH running a child prostitution ring for Pacific Heights billionaires AND helping to embezzle government funds for Moscone Convention Center AND Embarcadero Center but one managed to do both, on behalf of the others.

James Bronkema was known as David Rockefeller's "Bag Man" on the West Coast. He looked exactly like the greedy little "Monopoly Man" Billionaire on the game-board and even sported the same mustache and vest just to make the point that he was not only corrupt, he was BAD ASS CORRUPT and he would get the Rockefellers on your ass if you messed with him!

James\_Bronkema  
"Bronk"

When a real estate or political policy action needed to be greased, Bronkema or Coblenz showed up with the cash for the Supervisors, inspectors and public policy-types. Bronkema was one of the creators of "Flower" and ran the cash into John Molinari's Mayoral campaign. He put his girl-friends in executive city jobs as payoff for services rendered. Their hope was to move Molinari from Mayor, to Senator to Governor and on up... but that didn't work out..... when the FBI showed up on some doorsteps.

JAMES\_BRONKEMA\_EVIL  
James Bronkema

Bronkema ran the Business Bureau, The Golden Gate Bridge, Embarcadero Center and Rockre, a "private business operations group" for the Rockefellers. He funneled kickbacks, crony deals and special favors from San Rafael to Oakland to City Hall. When his manipulations went international, he cooked his own goose.

JOHN\_MOLINARI\_FEINSTEIN  
John Molinari "Old School"

They got a different party to play Senator and Molinari was forgotten but not forgiven for his false campaign district address, tax form creativity and family police incidents. A bug was placed in

Molinari's Classic Jaguar and feds got quite a bit of dirt on old-school San Francisco corruption off of Molinari's North Beach idle chatter. Molinari then turned State's evidence.

Once Molinari ate it in the elections, they plowed all of the cash into Feinstein.

A key associate (Goudie, aligned with Molinari) was a top Presidential appointee and campaign funder who was arrested and indicted for federal funds fraud in the Christopher Columbus Scandal which emulated the Golden Gate Bridge Scandal with the same consultants. (Check out his old Facebook page).

CHRISTOPHER COLUMBUS AND THE MOBSTERS:

COLUMBUS1 COLUMBUS2 COLUMBUS3 COLUMBUS4 COLUMBUS5 COLUMBUS6  
COLUMBUS7 COLUMBUS8 COLUMBUS9 COLUMBUS10 COLUMBUS11 COLUMBUS12  
COLUMBUS13 COLUMBUS14

In a special event scam, that Molinari and Bronkema schemed up, (that was a bigger Disaster than the recent SF America's Cup), quite a bit of taxpayer cash went sideways.

Said Marin County activist, Gene Pratt: "The Golden Gate Bridge District is a bunch of Crooks"

TERRY\_SELLARDS\_SHILLMASTER

TERRY SELLARDS: The PitchMan

The new Silicon Valley Prostitution cases have opened up the Old San Francisco child prostitution cases, as girls reveal decades of abuse and finally tell reporters what really happened back then. Which Silicon Valley and SF Venture Capitalists, who you see quoted in the news lately, were founders of "Flower" the top secret San Francisco underage sex ring for billionaires, held in the billionaires hotels so surveillance security could be totally controlled, (With SF, NYC and Silicon Valley Branches), which is, apparently, still operating? Why are they so excited about all of the underage girls coming over the border in the Mexican child border crisis? Why are Silicon Valley CEO's and VC's so supportive of "child Immigrants"?

Paying a bribe for real estate exclusives was often done with cash and hookers, known as "pink cash" in SF.

Why was NAMBLA allowed to thrive in San Francisco at the time, Including being given San Francisco Public Libraries, On Potrero hill and in other locations, to hold their secret "how to abuse children" meetings? (See FBI reports on NAMBLA)

Which San Francisco billionaire VC, in the news lately for other reasons, has a regular weekly appointment to have six nude girls come over and read him books from his library while he pleasures himself?

Which one is under investigation regarding a murder and an attempted murder?

Which one ordered a "hit" on someone?

Part of Kubrick's film: "Eyes Wide Shut" was based on "Flower". The cost for a young virgin started at \$50,000.00. Taking her virginity was called: "picking a flower".

Run all of the names on your database and draw the financial, business and personal connections and see how interesting this case REALLY is!

Who was the bigger real estate guru: Blum, Rockefeller or Shorenstein?

What do Dianne Feinstein, Richard Blum, James Bronkema, Roger Boas, John Molinari and David Rockefeller all have in common? All them reported to WHO?

Nobody can now say they "didn't know what was going on!" The evidence overtly implicates all of the players.

Was there a different reason, than we were told, that Mayor George Moscone was killed? Dan White said he was "drugged up on Twinkies", was he drugged up on something else so he could carry out his "kill orders" from on high?

Who went to federal prison and who didn't?

Who ordered the case shut down, but who kept working on it because they thought there was a major cover-up going on?

Who took the fall while the others kept on keeping on?

Who paid for who's political campaign..and still does? Who pulls who's strings?

Who is under 24 hour digital device surveillance by 5 different agencies? (Answer: EVERY SINGLE ONE OF THEM, THEIR FAMILIES AND ASSOCIATES)

What is a RICO?

What did federal investigators find when they set-up an office in one of the suspects condo buildings across from his office above Chevy's Restaurant?

How bad is running a child prostitution ring for the San Francisco elite and Silicon Valley founders?

How much, in bribes and corruption, did the exclusive little bridge from one Embarcadero Center to another, over the public road, really cost Boas, Rockefeller, Molinari, Bronkema and Feinstein?

Who is still operating as a front for whom?

Let's discuss. Send in your links. Watch for the YOUTUBE VIDEO: Anatomy of A Civic Corruption Case and please ask PBS Frontline to pick up the full length version!

Please ask City, State and Federal agencies to OFFICIALLY RE-OPEN THIS CASE!

[wpvideo fsB9480q]

## BRIDGE

This bridge broke the camels back and connects, politically and financially, to The Golden Gate Bridge District which was, at the time, operated as a private government for personal profit by the suspects. These is the only real estate project in the City that got this deal...bribes DO work!.... until you get caught! Notice the "bunker-like" Compound construction of Embarcadero Center shaped like the Bohemian Club "Owl Books"

## JMSFPDCASE-Page1

To protect the identity of the abused girl, we will not show the un-blurred form but it, and associated files, can be seen at SFPD, FBI and WIKILEAKS via FOIA

## ASSET2

The complexities of sex party and secret meeting hiding

## Rock66

When you make a chart of all of these people and their political, personal and business connections, almost everything is revealed . / Says David: "The greatest fun you will ever have, in your life, is dropping these names into a Federal Cross-Checker, like XKEYSCORE, FCCPS, or NCVS, and watching the results! Afterwards, add "Feinstein", or "Saxeena", and try it again. Wow! Epic!"

David T. is a Federal Special Investigator. Says David: "The greatest fun you will ever have, in your life, is dropping these names into a Federal Cross-Checker, like XKEYSCORE, FCCPS, or NCVS, and watching the results! Afterwards, add "Feinstein", or "Saxeena", and try it again. Wow! Epic!" David also stated that: "John Goudie's (Of Christopher Columbus Anniversary Fame) stand-alone case files, by themselves, are a week of Ludlum-class reading. He was so old-school"

The most interesting lines of connection in the organized crime databases go from David Rockefeller to Tony Blair To Rakesh Saxeena (Tony Blair interceded in Saxeena's trial in England over Blackwater gun running, a case that ties back to Senator Leland Yee's arrest) to Wendy Deng to Rupert Murdoch. Said David: "Sierra Leone is the most out of the way, tiny, sad little country but the mega-billionaires will do anything to get the raw gemstones and mineral ore buried under it.... Rakesh Saxeena is the most dashing, undercover, mysterious, amazing spooky guy you will ever meet in your life. Rockefeller may think he is bad-ass but he is in kindergarten compared to Rakesh. Is he evil, Is he secretly saving countries or secretly destroying them?...hard to say.... Oh, and by the way, The Illuminati never, ever,

call themselves "The Illuminati"..... There are five groups of "businessmen s clubs" who get together to plan laws, purchases and contracts that will increase their stock value and profits. They do share common beliefs but not all five share the same beliefs so they are always in a subtle war. From time-to-time some jump ship from one group to another. It's as simple as that..... They love the myth of the "Illuminati" because it creates confusion and disinformation. The "Illuminati" are a bullshit myth. The businessmen s clubs are the real deal and you can see them at work in the headlines every week. The 'ceremonies' at the Grove and the Masons and the other outfits are simple psychological reinforcement tactics to make them all feel more bonded and "above it all". It works."

Goudie was trying to copy the financial skimming scam that the Golden Gate Bridge directors were using for their Golden Gate Bridge Anniversary scheme to fund campaigns and personal hobbies. Goudies business partners ratted him out, though, first claiming he killed his wife, by bludgeoning, to get the attention of the feds. Goudie went to prison but various murder claims never stuck.  
Part 2- The Investigation Deepens

Now that key players are either dead, indicted, arrested or otherwise interdicted, the rest of the story can be revealed.

Rockefeller and Bronkema came up with a plan to build the downtown version of The Bohemian Grove; A financial district compound which was totally under their control and that could cut off the "little people" of the outside world unless they were needed to deliver sandwiches or run errands. All of the Bohemian Grovers and cartel planners could be in the same buildings, keep their girls in the adjacent condo's and it would be one big happy, corrupt, family. You will find, in records searches, that almost everyone from the spooky Bohemian Grove sex and monopoly planning club, also had offices in the Embarcadero Center compound.

James\_BRONKEMA\_ILLUMINATI  
James Bronkema

A walk around San Francisco's Embarcadero Center reveals a Q-Sensitive militaristic facade of concrete bunker-like structures where you can never walk without 3 cameras on you at all times. Metal sign-plates in the ground remind you that you are not in the outside world and that you better watch your P's and Q's. An ideal configuration for a modern version of the Speak-Easy, ready to hide dirty deeds upon a "Cheese it, The Cops" internal announcement signal. There is only one way in and one way out for the entries, all carefully guarded and monitored.

Bronk, a builder, was trained by the Rockefellers in "private governments". He honed his skills running the Golden Gate Bridge, it's own private government suspended in a no-mans land between San Francisco and Marin Counties, but accountable to no one. It was supposed to stop charging tolls once the bridge was paid for but the cash flow from taxpayer to bridge director pockets was so good, they figured, "why kill the golden cow". Many bridge directors have now faced the law over "accounting discrepancies. Bridge Directors are now pretty much under permanent 24 hour digital law enforcement surveillance because they tend to be so naughty.

29

The entire foundation of the house circled on the right was built from stolen Golden Gate Bridge steel, paid for by taxpayers money, and looks right in the window of another Golden Gate Bridge executives home (the

house circled on the left).

Then the operation moved up. Big Office complexes with their own bridges between buildings (So you never had to interact with the commoners) and fancy hotel chains that were hidden behind layers of trusts, assumed names, holding companies, corporate facades and inter-level contracts were the new private government.

This was the perfect layout to evade law enforcement. Not only could you trot parades of hookers in, and out and ditch the video, you could have all kinds of secret sketchy meetings. The Pacific Union Club, (The Original Bohemian Grove Urban Compound) on top of Nob Hill, has a little Victorian house across the street. (next to the parking garage) from it on California Street. That house has a tunnel under the street to the Pacific Union Club for bringing the Hookers in; according to Tommy, the former car lot attendant. That pales in comparison to the Bronkema/Rockefeller scheme.

After each sex party, or sketchy meeting, they would order all of the security cameras to have a Lois Lerner-like hard drive crash. They believed this destroyed all of the evidence. They controlled all of the buildings and all of the security, they could do as they please...they thought. Some former security guards saw the profit potential in hanging onto some of those tapes and hard-drives before they got wiped.

#### JAMES\_BRONKEMAS\_GIRLFRIEND

The Girlfriend

The recent death-by-hooker of the ultra high tech Google executive shows that even the most savvy ultra-rich geeks can't hide from surveillance camera interdiction.

The cool thing about cameras is that they turn all audio and video into a signal, the interesting thing about that is that any signal can be intercepted, even before it reaches the security office. Let's repeat: Somebody else can ALWAYS get the signal before it gets to where the bad guys think it is going to go! Private activists now have Bohemian Grove under personal drone surveillance, camera interdiction and, the wilder ones, have pre-climbed Redwood trees, in advance of the retreat, and placed hidden micro-tiny chip cameras high up in the bark of the redwoods... this will be interesting.

#### SURVEILLANCE-VIDEO

Surveillance Video Is Forever!

But, this was part of the downfall. Those who believe they are immune from the law finally make pretty big mistakes. Their ego and power mania's always bring them down.

When Bronk and his Rockre associates started meeting with NGO's, Nigerian Oilfield barons, The notorious Rakesh Saxeena (Look him up) and middle east mining heads; Interpol, GCHQ and all kinds of law enforcement people became interested.

To his dying day, James Bronkema denied that he was "A Bohemian Grove Grand Wizard", or "West Coast Grand Master of the Illuminati" or anything "creepy or mysterious". "I am merely a humble servant to the world's needs", he said in one of his last communications with a reporter...

Now some people might read this and say to themselves: "This is all too creepy, I don't live in this world, I don't want to know about this. I just want to drive my Escalade and pick up the eggs at the store each morning"

But the fact is, You DO live in this world. IF you choose to ignore the facts that create the world you live in, then you make yourself like a farm animal, a cow, breeding stock to be harvested for revenue. Do you really want to be that dumb and used?

You really might want to think about helping law enforcement to bust the bad guys and helping politicians to make laws that help the public and not the campaign billionaires.

Worst case scenario: Egomaniac billionaires, who loved sex with children, controlled the real estate deals in San Francisco, because they needed to feel powerful. They had George Moscone killed because he wasn't cool with their sex ring/real estate shenanigans and to put their own person in the top post in Government, aimed for the Presidency. The investigation needs to be re-opened and all cover-up actions overturned.

Journalist Notes:

### ### Dianne Feinstein

-  
-  
Her daughter, Kathryn used to tell stories, in social groups, about her mom that were not flattering. At one point, she and her Mom were on the outs. Some San Francisco Bay Guardian, and SF Weekly, newspaper staff were Kathryn's same age, traveled in the same circles, and were privy to some of these conversations. This put an early watch on Feinstein.

When the current mayor was conveniently murdered in his office, Feinstein was in the, strangely, perfect spot to take over as Mayor, without an election.

Feinstein got a man named John Molinari, a character known to have ties to the old North Beach mob in San Francisco, placed as head of the Golden Gate Bridge District and her campaign financier, James Bronkema, known in the local media as "David Rockefeller's bag man on the West Coast" (for his constant bribes for real estate permits), placed as co-head. These two ran the Golden Gate Bridge district, and its anniversary party, into what network news broadcasts' called a "morass of corruption, cronyism and failure". In the meantime, Feinstein prepared her Senate plans. She had set Molinari up to take over, for her, as her Mayor, with her administrator: Roger Boas, as the back-up plan mayoral candidate.

Both of her candidates not only lost, but Roger Boas went to federal prison for corruption, racketeering and prostitution scandals and John Molinari was removed from politics and placed under federal surveillance. His daughter filed a police report against him for abuse, and she had to be removed from his home and taken to a secure children's center, on California Street in San Francisco, for protection. Molinari was also found to have lied about his place of residence during his campaign. Boas was charged with involvement in an under-age prostitution ring for San Francisco elites. The British "Hydrant" investigations into a global political elite pedophile ring, have now tracked back to Senator Dennis Hastert, campaign backer Jeffrey Epstein, Senator Graham, Nick Denton (Who interacted with the British suspects in BOTH the British "Hydrant" and British "Tabloid Phone Hacking" investigations), and other members of Congress. A recent Chinese hack of ALL federal employee background checks, has put the sexual interests of all of Congress at risk.

When the Toyota NUMMI plant was going to go out of business, Feinstein's Chief of Staff contacted anyone who tried to use the building and warned them to "back off" and/or threatened other California competitors with "political problems" if they got in the way.

Feinstein sabotaged any outside efforts to use the NUMMI factory, or to make competing energy systems to Tesla, or to compete with Tesla in any way because her family had already made campaign finance deals with the NUMMI, Tesla Motors and Solyndra people and she owned the construction company (Penini), employment service (via her relative Herb Newman), leasing company (CBRE) and adjacent railroad property rights contracts for Tesla and Solyndra. Over 40 California technology companies were damaged by Feinstein's sabotage.

Feinstein and her family funds, trusts and PACS made billions on the Cleantech deals. She has also been charged with rigging postal property deals, railroad deals, U.C. Regents appointments and hundreds of other political actions for her VC Husband: campaign financier and White House "advisor": Richard Blum. Solyndra was raided by the FBI, when the first major signs of corruption were exposed by investigators, but Feinstein buddy: Attorney General Eric Holder, never allowed the full Solyndra investigation to be released, because it was soon discovered to lead right back to top White House staff, including Gibbs, Plouffe, Emanuel, Axelrod and others. The records of the entire Solyndra investigation will cost famous people their careers, names and historical positions.

### ### Elon Musk

-  
-  
-

Elon Musk is a campaign financier for Feinstein, Reid and Obama. Elon Musk was partnered with John Doerr to control the Lithium Ion Battery industry based around the Afghan Lithium ion mining contracts and control of the electric car market. Recent news stories have revealed that his business is based on White House taxpayer hand-outs, as kick-backs, for acting as conduit for John Doerr's campaign finance deals. Feinstein got him his California factory and Reid got him his Nevada factory. Elon Musk hated fuel cells, ultra-capacitors, gasoline, diesel and anything that competed with Lithium ion, which he, Steven Chu, Feinstein and John Doerr had invested in. They all participated in sabotage campaigns, against all of those other fuels, using fronts like "EV WORLD", "PLUG-IN AMERICA", "THE FOOL" and other shell groups they controlled. Lithium ion technology turned out to blow up for no apparent reason; needs to come from countries that need to be invaded; gives off vapors that cause cancer, brain damage and kidney damage; loses its energy life span and has over a hundred other problems with it. It has set senior citizens, children, Apple stores, homes and offices on fire and crashed multiple airplanes, killing the passengers. When you smell smoke in your passenger airplane, it is usually a lithium ion cell phone battery "going thermal" and releasing fumes. Greed over-came proper scientific oversight in deploying lithium ion in the way that Musk did. When Musk went to Russia, he met mobster businessmen who pitched him a mining deal for Afghan lithium fields. In fact, investigators now know, that Steven Chu, strangely, gave U.S. Taxpayer DOE cash to Russian controlled Ener1, Severstal and other companies when the Section 136 law said the money was only to be used to help American businesses in need. The Musk/Russian-mob connection seems to have been hot, then soured, when his lithium mining and rocket engine deals fell apart, the killing of which was facilitated by GOP operatives.

When Musk took Tesla away from its founder: Martin Eberhard, in a hostile take-over, (Musk never "founded" Tesla) he had to build the car in a very expensive way. He and Doerr ordered their friend: Steven Chu, to sabotage every applicant, for DOE money, which tried to make affordable cars. An affordable alternative energy car would kill off Tesla almost over-night. History has now proven that the metrics that Tesla used were disastrous, in that they have now spent more money, to sell less cars, than any company in history, while making an electric car that should have been easy to build. Tesla missed every single milestone, dramatically, that it proposed in its original DOE application documents, yet Steven Chu ordered the DOE to look the other way in order to protect the White House deal.

Historical facts have now proven that every applicant for DOE advanced vehicle money was sabotaged and rejected, particularly if their car was affordable, and accessible, to the American public. Tesla couldn't survive an affordable electric competitor, at the time. Tesla investors bought most of the first Tesla's in order to inflate sales numbers. Musk was caught sending potential customers an email asking them to put a deposit in, before the SEC filing date ran out, so he could claim the deposits were completed "sales" in order to inflate SEC filing sales numbers. He also booked government hand-outs as "sales" in his SEC filings.

A Congressional investigation proved that Tesla had lied to get its loan and that his friend: Secretary of Energy Steven Chu, had assisted in the scam at the same time that others had applied with a superior set of application metrics. Tesla's "debt ratio" was the worst of any applicant, they had no final design, their car did not work, they were 2000% over budget, and they were using the funds to buy buildings for Richard Blum, even though the DOE Section 136 Law said: don't do that. Treasury said that Tesla had a bad credit rating and every other applicant beat Tesla on metrics. Yet Tesla still got the cash,

along with hand-held walk-throughs, in the DOE process, from crony: Steven Chu. It was a lie that Tesla could have survived without the loan. Musk was caught on camera saying that Tesla was “on the verge of bankruptcy” when they applied to DOE, a violation of the federal Section 136 law. If this went through a court hearing, Musk and Chu would face felony fraud charges in violation of Section 136 law. Eric Holder would never let DOJ even consider such an action, in order to protect White House financiers.

Google worked with Musk to delete any negative mentions about Musk, or his projects, off the internet. Most of the internet is Google- controlled. Google would “top-page-lock” any attack articles that Gawker was ordered to generate, on Musk’s competitors so that no outside IT service could get those attack articles removed from the top position. This made them stay on the top lines of Google’s search pages forever. Even when lawyers wrote to Google to demand removal of the character assassination “lock-in’s: on the top of Google’s search pages, they were told: “Get a subpoena and then we might think about it..”. This “lock-in tactic” destroyed the life, and reputation of a famous wrestler, which may lead to Gawker’s final down-fall, in exchange for destroying so many other lives, out of sheer spite.

Musk has been proven to have lied, mismanaged and engaged in a commodity trading scheme with Goldman Sachs. Goldman Sachs has already been hauled before Congress once, to start the investigation of this commodity monopolization scheme.

The rogue spy firm attack services group: In-Q-Tel, provided staff to Musk. In-Q-Tel staff now help run his Space X company. Space X was given most of NASA, Ames Moffet Field, and free private jet fuel as a gift in exchange for conduit-ing campaign funding.

Musk was forced to give his patents away for free, because they were not only found to have no value, but to also accidentally disclose, within the very text of the patents themselves, the fact that Musk’s batteries could be lethal and destructive in spontaneous explosions, according to the Tesla engineers who wrote the patent, three of whom suddenly, and strangely, died in the same airplane crash.

A large number of employees, customers, partners, wives and investors have sued Musk for fraud. Clinical psychologists have openly analyzed Musk, in the media, as a sociopath. Musk has bought hundreds of magazine articles and TV shows about himself due to his narcissistic nature.

Musk is now working on a railroad project called the “Hyperloop”, with Dianne Feinstein’s railroad-kingpin husband’s company, in order to seek to acquire more federal cash. All three of Musk’s companies would not exist without nearly \$10 Billion dollars of federal kick-back cash and “favors” Musk has received. The State of California has given him nearly 80 million tax dollars via the Controller: Lockyer and other State Officials. California Attorney General Kamala Harris refuses to investigate due to campaign connections.

Surrounded by private jets, fashion “models”, and other corrupt billionaires, and with the protection of the United States Secretary of Energy, The U.S. Attorney General, The California State Attorney General and the President (All of whom have now been Sunshine disclosure-proven to have been placed in office by Doerr’s “Silicon Valley Cartel”), Musk and Doerr believed themselves to be “untouchable” (Just like Al Capone)and able to get away with anything, without consequences. All of the above data appears in many journals outside of the U.S. but it is never allowed to appear on Cartel owned: Reddit, Google, Hearst Publications, Facebook or other Cartel controlled U.S. media (Doerr/Schmidt/Musk Cartel groups now control almost 75% of U.S. digital media)

#

*Illustration 1: JOHN MOLINARI - San Francisco "Bag Man" for Feinstein deals. His daughter was removed from his home, per San Francisco Police Department Reports, for "child abuse".*

# The Worst Case Scenario

While there are many theories about how the largest set of failures, that had received the most government money all failed in the shortest possible time, one theory is the most disturbing:

The theory says that Silicon Valley Venture capital companies including Kleiner Perkins, Draper Fisher, Greylock and their friends came up with a scheme to rig the Presidential election, and a few Senate elections, in exchange for a commitment to only give them the Department of Energy funds.

They got the Obama campaign to agree to the deal and the deal started happening but then Congress got wind of it and took the whole plan apart.

Indeed, those VC's are almost all of the only beneficiaries of the Cleantech scheme.

As a fact, all of their competitors suffered set-backs, lies, stone-walling, denials and attacks that were manifested through either those VC's or Department of Energy officials associated with those VC's

That group of men were the campaign financiers of the Obama campaign and they control the only search engines and database systems that COULD rig an American election.

While the idea may be "far fetched", the fact is that the odds of that same tiny group of people all being the financiers, beneficiaries and intermediaries are astronomical unless they conspired to create the circumstances in an illicit cartel scheme.

## **Conclusion:**

White House and Energy Department officials engaged in a kickback financing campaign using state and federal taxpayer funds. Only campaign financiers were allowed to receive per-arranged funds and all of their competitors were sabotaged, stonewalled and black-listed if they were not Obama campaign financiers on a per-approved covert list. Senators Dianne Feinstein and Harry Reid facilitated the crimes. The U.S. Department of Energy was used as a “slush fund” to pay off campaign financiers and to attack and delay those campaign financiers competitors. While the corrupt public officials have tried to play the whole thing off as “just a case of the D.O.E. having stupid people on the staff”, the truth is that the matter was a haphazard cover-up of a poorly executed and organized crime that sent “the rats scrambling” when it fell apart. Historical facts have now proven that “only Obama campaign financiers received the cash, contracts, revolving door jobs and stock benefits of the program and their competitors and non-campaign financiers were attacked and obstructed.
