

[VINOD KHOSLA HAS NO RIGHT TO CHARGE CALIFORNIA \\$30M FOR HIS NUCLEAR BEACH](#)

# **The History-Making California Disaster That Can Never Be Covered Up: Fuku-Fornia!**

SILICON VALLEY OLIGARCHS CONTROL CALIFORNIA MEDIA AND HUSH UP THIS DISASTER

While California is talking about leaving the United States, a horrific situation may require that the United States build a Chernobyl-type wall between California and the rest of America.

That wall will not be due to a political disaster but, rather, a radioactive disaster.

Realty associations, Chambers of Commerce and Jerry Brown are spending billions of dollars on PR counter-measures to say "nothing to see here" about the Fukushima radiation.

You can cover-up lots of big bad things but radiation detectors are now very cheap and easy to get and California has so much Coast-line that the entire U.S. Army could not keep people away from it.

There is no possible way to stop boat owners and the general public from dipping their Cesium probes, fiber test strips and EBAY-purchased radiation detectors in the Pacific Ocean.

The tons of hyper radioactive water pouring into the Pacific Ocean in Japan has been discovered to be a thousand times more radioactive than once thought. Forget about *causing* Godzilla. There is enough Cesium coming off the North coast of Japan to *kill* Godzilla!

The water pouring out of Japan swirls around the Pacific drum and pastes itself into the sandy beaches of California and Oregon where it is sucked deep inland, like a sponge, through a process called deep soil transit.

4 parts per metric of this kind of radiation will kill you. Fukushima is pouring 600 PARTS PER METRIC, by THE TON, into the Pacific Ocean. That is a seriously bad thing!!!!

The Silicon Valley Oligarchs tell their owned newspapers and lap dog Jerry Brown to hush up the disaster because they all own lovely coastal property investments.

## **US govt agency manipulated data to exaggerate 'climate change' ahead of UN conference - whistleblower**

February 9, 2017

- [Facebook](#)
- [Twitter](#)
- [Google +](#)
- [Stumbleupon](#)

A recently-retired top scientist from the America's National Oceanic and Atmospheric Administration (NOAA) has accused his superiors of fudging data to hide a slowdown in the rise of global temperatures ahead of the UN Climate Change Conference in 2015.

John Bates [told](#) the Mail on Sunday that Thomas Karl, the head of the [climate change](#) department at the government agency, authored a paper based on doctored data, "*rushed*" it into publication, and then saw his work used to make international commitments to fight global warming worth hundreds of billions of dollars.

***Canadian Prime Minister Justin Trudeau, Microsoft co-founder Bill Gates, Former US President Barack Obama, French President Francois Hollande and Indian Prime Minister Narendra Modi at the Paris Climate Conference in 2015.***

After rising by 0.113C per decade between 1950 and 1999, temperatures appeared to have stabilized between 2000 and 2014, despite rising levels of CO2 emissions, which climate change scientists said were responsible for the earlier warming.

The “*pause*,” unveiled in a 2012 UN report, shook up the entire scientific community, and cast doubt upon hundreds of models confidently predicting a trend of accelerating warming.

#### ***The main Pausebuster study graph.***

But then, Karl's "pausebuster" [paper](#) emerged, just months before Barack Obama, Angela Merkel and scores of other world leaders congregated in Paris, showing that global warming was not slowing down, but actually accelerating to 0.116C per decade.

Bates said that in the period preceding the publication, Karl was "insisting on decisions and scientific choices that maximized warming and minimized documentation... in an effort to discredit the notion of a global warming pause, rushed so that he could time publication to influence national and international deliberations on climate policy."

Bates claims that the land temperature readings cited in the study were calculated using two combined historical records, with the help of an unfinished and buggy piece of software, whose findings cannot be independently verified, and have still not been confirmed by the authors. For the sea temperature records, Karl decided to use temperatures collected by ships.

*“They had good data from buoys. And they threw it out and ‘corrected’ it by using the bad data from ships. You never change good data to agree with bad, but that’s what they did – so as to make it look as if the sea was warmer,”* said the scientist.

Bates, who had devised the internal data evaluation protocol at NOAA, claimed that he gave his colleagues a *“hard time”* about their conclusions, and *“they never really justified what they were doing.”* He insists that the paper never

passed the agency's own evaluation criteria.

Once published, it was immediately [questioned](#) by notable climate sceptics, and Republican House Science Committee Chairman Lamar Smith, operating from data obtained from a then-unknown "whistleblowers" subpoenaed NOAA, unsuccessfully demanding that the agency reveal its internal communication pertaining to the paper.

Despite the fierce controversy around the paper, its contents were widely disseminated by the media. It was also prominently referenced during the Paris conference in November and December 2015, at the conclusion of which world leaders promised to transfer \$100 billion per year from wealthier countries to poorer ones to fight climate change, and vowed to ensure that temperatures do not rise by more than 2C.

Bates, who has [served](#) as a member of the board of directors of the American Geophysical Union (AGU) and was awarded the US Department of Commerce Gold Medal in 2014 for his work in collecting and archiving climate data, says he was driven by public alarm that President Donald Trump, a noted climate change sceptic, would order the defunding of key agencies, and the deletion of temperature records.

*"How ironic it is that there is now this idea that Trump is going to trash climate data, when key decisions were earlier taken by someone whose responsibility it was to maintain its integrity - and failed,"* Bates said.

***Dr. John Bates, former NCDC Principal Scientist.***

Having retired from NOAA last year, the scientist, who has since opened a private consultancy firm, said his words could spark reform at an agency that had employed him for three decades.

*“I’m hoping that this will be a wake-up call to the climate science community... I want to address the systemic problems. I don’t care whether modifications to the datasets make temperatures go up or down. But I want the observations to speak for themselves, and for that, there needs to be a new emphasis that ethical standards must be maintained.”*

**Karl denies faking data**

Reaction to the revelations has predictably split along [previous allegiances](#).

Karl, who also left his post last year, denied to the Mail on Sunday that he was preparing the paper specifically for the Paris conference, and said he did not properly archive and disclose his data, as it is a *“process that takes a long time.”*

The Grantham Research Institute on Climate Change and the Environment at the London School of Economics [said](#) that one of the graphs used in the article was deceptive, and that the article as a whole was *“fake news to mislead the public and policymakers about the scientific evidence for climate change.”*

Michael E. Mann, the Penn State scientist responsible for the since discredited hockey-stick temperature graph, called the article the *“latest denialist smear against #NOAA scientists”* in a tweet.

CONFIRMED: [@NOAA](#) rushed 2015 climate change study to publication to support Obama's climate agenda despite underlying data issues

— Sci,Space,&Tech Cmte (@HouseScience) [February 5, 2017](#)

But Lamar Smith thanked Bates *“for courageously stepping forward to tell the truth about NOAA’s senior officials playing fast and loose with the data in order to meet a politically predetermined conclusion.”*

NOAA, AGU, and Science, the journal that published the 2015 paper, have all released statements, saying that they are aware of the revelations, without committing to a judgement on their substance.

# **Silicon Valley Oligarchs Uncovered Running Trillions of Dollars of Political Fraud Crimes!**

- Investigators accidentally discover rigged “Climate Change” data has connections to Silicon Valley organized crime scheme
- The Silicon Valley Mafia scammed the entire world in order to run a ponzi scheme
- Polar bears didn’t die but witnesses to the crimes did
- The climate is changing but [John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla and Steve Jurvetson manipulated fear in order to scam trillions of dollars](#)

**By Citizen Sleuths 2.0**

**Washington, DC** - Federal investigators have uncovered evidence of dramatic fraud in Federal Science Agency research regarding climate change.

Who cares?

What does a rain storm or two have to do with our lives in this economically troubled world?

Has anyone every tried to punch you in the nose for saying you do, or don’t, believe in Santa Claus? Why would people punch you in the nose and scream in front of the U.S. Congress about believing in, or not believing in, Climate Change? The answer is: CASH!

The Climate Change issue in Government has virtually nothing to do with the climate, environment or anything even remotely organic or natural.

What would you do to have every Hollywood teenage dream come true? If you were a spoiled fraternity-house raised Stanford alumni upper crust male you would want to have sex with a different supermodel escort every night. You would want to buy new Tesla’s and Ferrari’s every month and have dinner made for you at the most expensive restaurants in town every night. You would fly to the base camp of Mount Everest, to a snow field in Antarctica and to Paris, just to take selfies to show your bro-buddies. You would buy a different Brioni silk tie every day. You would buy the best heroin and cocaine every week. Generally, you would spend \$30,000 a week on crazy self-indulgent

show-off crap.

You would be addicted to your hubris and narcissism. To keep that life-style going, you might even kill some people.

That is how bad things are in this scandal.

A group of forensic researchers made a science-data fact study of what was going to happen socio-financially when Obama announced that “climate change” was going to end life on Earth. An interesting discovery occurred. The discovery had nothing to do with Polar bears, Amazon forests or dolphins. It had to do with The Mafia!

The Silicon Mafia.

It turns out that if the United States had made “Climate Change” a national agency-dedicated budget issue, only 7 men would have had the key profiteering windows in that policy event: John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla and Steve Jurvetson. Those men happen to be the key bosses of The Silicon Mafia.

Those men were the key financiers and internet information manipulators of Barack Obama and Hillary Clinton’s political campaigns. It was a Pied Piper Scam. They said they would get rid of your snowstorms but they took all of your tax money and corrupted your government instead!

Barack Obama and Hillary Clinton were massively promoting Climate Change as a national agency-dedicated budget issue.

Get it? Even though there is some Climate Change going on, Barack Obama and Hillary Clinton, ironically, had staged the issue so that only their campaign financiers owned the companies that they said could “solve the problem”, and, they said the Government had to give those 7 billionaires trillions of taxpayer dollars. What a coincidence!

The weirdest part of the realization is that it was Democrat GAO and OPM investigators, who describe themselves as green energy lefties and whale loving outdoors fans, who discovered the scam.

In the new Trump Administration, the lefties are scrambling to try to hang on to the last shreds of greenie environmentalism. Before the last of them got bounced out of the new Alt-Right Washington, DC, they started leaking White House phone transcripts and climate data. Alas, some of the agency research data turned out to prove that the climate data had been faked in order to buy some new private jets and hookers for the Silicon Valley billionaires.

This was a twelve trillion dollar scam. If the Obama, or proposed Clinton Administration had fully executed on their Climate Change schemes: John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Steve Jurvetson and their crony’s would have gotten twelve trillion dollars of the public’s state and federal tax funds piped directly into The Silicon Mafia’s personal bank accounts. Numerous investigators have now published reports that the climate change “facts” were faked in order to steer government funds to Silicon Valley campaign financiers.

John Doerr’s Kleiner Perkins Company has an employee named Al Gore as a venture

capitalist. Al Gore makes movies and lectures about how climate change will kill us all if we don't give Kleiner Perkin's hundreds of billions of dollars. Kleiner Perkins, Google Ventures, Khosla Ventures and a little rat pack of corrupt venture capitalists hired McKinsey Consulting to figure out what the biggest government funds scam in history could be. They wanted to find a fake issue that would capture the imagination of the public, be "non-objectionable" (unlike abortions) and get easy pass-through by Congressional budget offices, ie: "*It will save the polar bears, we must do it..*". Let us be clear, the climate IS changing but everybody EXCEPT Kleiner Perkins and Khosla Ventures cares about the polar bears. They care about how much cash they can get to buy hookers and private jets!

The family and friends of dead people who blew the whistle on the Silicon Mafia's climate payola scheme claim that either John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla or Steve Jurvetson had their family members killed to try to cover up the epic crime. Check out the strange deaths of Gary D. Conley; reporters David Bird, David Werner, Micheal Hastings, Aaron Swartz, Dominic di Natale & Andrew Breitbart; Rajeev Motwani; Forrest Hayes; Ravi Kumar; Dave Goldberg; Karl Slym; Doug Bourn; Danny Lewin, Seth Rich and over 185 others. All dead; All connected to whistle-blowing on John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Steve Jurvetson and their crony's. If they didn't kill you with a bullet or poison they killed your life with character assassination attacks by their Gawker Media, Media Matters or Think Progress attack dog facades.

CBS News investigative TV series 60 Minutes did a segment called: ***The Cleantech Crash***. The episode began to examine the crony corruption that the climate change kickbacks had schemed up. The world famous reporter Bob Simon, much loved as a hard charging CBS News go-getter, was suddenly killed in an out-of-the-blue car crash. CBS News reporter Cheryl Atkisson then had a number of Obama White House ordered hit-jobs run against her. John Doerr, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Steve Jurvetson and their crony's were serious about keeping their scam covered up. The Silicon Mafia had a mob-lieutenant in Washington named John Podesta. Podesta was the modern Sidney Blumenthal of hit jobs. Email leaks of his private emails shows Podesta and his partners ordering associates to act "Like the Mafia".

Everything was going along swimmingly. The scheme got slowed down in the Obama Administration but all of the same players had cloned their play over to Hillary Clinton's operation and had doubled in the support of an emerging boss: Tom Steyer. The scene was set to exceed even the twelve trillion dollar payola projections.

Then the hand of fate played its **Trump** card! Their scam went sideways.

If you are a taxpayer reading this then call the White House and email Congress;  
**Demand arrests!**

Don't let these crimes slide. These manipulations of your trust and your tax dollars are a horrible transgression against YOU!

Greenpeace is already saving the polar bears and the seals. 52 groups are already saving the rain forests. All of the trees, fish and animals are already getting saved by armies of community service groups. Nobody needs the Silicon Valley billionaire nut-jobs to do anything!

Save yourselves and save America from the Silicon Valley Mafia. Demand that federal law enforcement arrest and jail: John Doerr, Elon Musk, Larry Page, Tom Steyer, Eric Schmidt, Steve Westly, Vinod Khosla and Steve Jurvetson for racketeering, corruption, fraud and homicide!

The facts prove the crimes. The facts are indisputable. The facts don't lie, but the Silicon Mafia does lie in order to scrap billions of dollars of unjust rewards into their Cayman Island hide-aways every month.

In the most twisted irony of this whole mess John Doerr, Elon Musk, Larry Page, Tom Steyer, Eric Schmidt, Steve Westly, Vinod Khosla and Steve Jurvetson hate Donald Trump more than anyone on Earth. They accidentally made Donald Trump become President of the United States by running such an overt crime spree, using government money, that the nation demanded a Trump that can go in and "drain the swamp" of Silicon Valley's corruption. California news outlets are controlled by Silicon Valley and are not allowed to cover the Silicon Valley corruption; thus, Californians are minimally informed about how bad these guys are..the rest of the nation, though, does read about the Silicon Mafia in non-tech titan controlled news!

However you feel about climate change, you have to believe that racketeering, corruption, homicide and fraud demand a federal prison sentence! These men are criminals and any person, agency or reporter who looks the other way, takes no action or covers up their crimes deserves to be arrested and/or fired!
