You have seen Scott's invention on **Star Trek**, In **Spectrum Holobyte's Star Trek Experience** in **Las Vegas**, at **SGI's** and the **University of Illinois CAVE** and in many venues around the globe. Multiple seminal patents for this technology were issued to Scott by the U.S. Government after extensive federal research proved that he was the first-to-invent and build the technology.

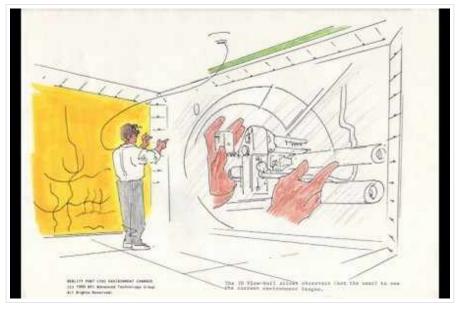

Scott's invention was acknowledged by The White House multiple times:
